Teacher Training and Effective Pedagogy in the Context of Student Diversity Liliana Minaya-Rowe, 2002-06-01 The purpose of this volume is two fold First the book attempts to initiate a research based dialogue from a variety of perspectives specifically about teacher training and teaching in the context of student linguistic and cultural diversity and second to cast a wide net over three major areas of professional development that have the potential to impact on teacher quality and on the educational services provided to ELLs at all levels of instruction This book represents a first attempt to a quiet revolution going on in teacher education Johnson 2000 It allows the reader to uncover research activities and experiences that constitute individual teacher education program initiatives A revolution because it is stirring the very essence of what stands at the core of teacher education a core that has long been based more on training to teach monolingual English speaking students and less on teaching ELLs their first and second language development using their bilingualism to teach academics and on the process of becoming an effective teacher of ELLs This state of the art review brings together research on effective pedagogy and teacher training The nine feature chapters are directly concerned with effective new structures and practices for professional development and are presented in a framework that considers a wide spectrum of topics to address issues such as what teachers need to understand about English language learners what kind of professional experiences are likely to facilitate those understandings and what kinds of teacher education programs and school settings are able to support their ongoing learning

The authors also discuss the implications of their work for helping English language learners connect and benefit from school from the points of view of 1 school reform 2 teachers bilingual proficiencies 3 teachers knowledge and beliefs and 4 teacher training programming and sustainability
