Customs Great Britain. National Audit Office, 2009 In 2007 08 HMRC received more than a quarter of the 4 million Tax
Credit renewals forms in July the renewal deadline and it processed half of the 8 2 million Income Tax Self Assessment
returns during January to March At busier times customers experience delays on their correspondence and receive a less
responsive service In the lead up to the Income Tax Self Assessment deadline in January 2008 HMRC answered just two
thirds of the 7 million telephone calls made to its contact centres By encouraging more customers to file tax returns online
and removing the need for some returns HMRC has smoothed peaks in workload and released resources of 7 million a year
The peak in Tax Credit renewal work has however increased as the deadline has been brought forward to reduce
overpayments Using different processing targets throughout the year and giving customers more information about how long
their information will take to process during peak periods could help spread work out throughout the year During busy

periods HMRC tends to process simpler Income Tax cases postponing more complex checks and less urgent work During peak periods staff productivity is higher partly reflecting the simpler cases but HMRC also experiences increased staff sickness absence The experience of HMRC and other organisations is that between 15 per cent and 40 per cent of contact with customers is avoidable Reducing the number of avoidable calls by 15 per cent could release resources of up to 23 million a year or 11 per cent of its annual spending on contact centres Tax Withholding and Estimated Tax ,1990
