Justice, Equality and Tax Law Nevla Čičin-Šain, Mario Riedl, 2022-10-05 An in depth analysis of the specific aspects of justice equality and tax law Justice Equality and Tax Law is a topic that is both old and new at the same time Even if the society changes the demands that tax needs to be just and equal seem to be immutable What changes of course is the perception of the content of those demands International taxation post BEPS has been fraught with new challenges that warranted urgent responses These challenges were mainly provoked by the unprecedented rise of the digital economy which truly marked a change in the way business is conducted how value is created and how goods and services are produced and consumed Digitalization in turn had repercussions on all aspects of taxation direct taxation indirect taxation and even tax procedures For instance the quest for more justice and equality in profit taxes was the reason why in October 2021 a historical deal based on a two pillar solution to address the tax challenges arising from the digitalization of the economy was negotiated within the OECD G20 Inclusive Framework on Base Erosion and Profit Shifting and agreed upon by 137 member countries It was also the motive behind the shift from a typical vendor collection model to an intermediary collection model supported by centralized registration points in indirect taxes notably the VAT GST Abundant data from the European Union or the OECD signaled an ever increasing gap between expected VAT revenues and VAT actually collected making it obvious that the classical system of VAT GST collection was unable to respond to challenges posed by the digital economy Therefore new solutions based on the participation of digital platforms as intermediaries had been introduced Finally new technologies such as blockchain paved new avenues in enhancing tax compliance In this context this volume entitled Justice Equality and Tax Law contains not only a selection of the best master s theses of the full time LL M programme in 2021 2022 but also represents an in depth analysis of various aspects of this evergreen topic Tax Management and Tax Evasion Konrad Raczkowski, Lukasz Sulkowski, 2014 The authors of this volume outline the issues of managing taxes and tax evasion mainly with a focus on the European Union in general and Poland in particular Tax management and tax evasion represent an intrinsic element of economic turnover an area of interest both to the institutional and to the real spheres of national economy *The New Horizon of China's Economic Law Theory* Shouwen Zhang, 2020-10-26 This book presents the development and reformation of economic law in China and explores the three relationships between the government and market between reform and rule of law and between the constitution and economic law On this basis it subsequently focuses on development theory distribution theory risk theory and crisis theory Further it addresses effective development fair distribution and prevention and resolution of related risks and crises which are important functions of economic law In order to achieve the above functions and objectives the book argues we must vigorously promote the integration of rule of law in economic law and constantly refine the theory of economic rule of law employed in China The book demonstrates that no matter how the three major relationships are adjusted or the relevant systems are reformed i e regarding the implementation

of the concept of coordinated development or the optimization of economic structures the solution of distribution problems or the improvement of distribution systems the prevention of risks or the response to crises any such changes depend on economic rule of law The above mentioned theoretical discussion presents a new horizon of contemporary Chinese economic law theory which will be of great value to the future development of economic law theory **Malaysia's Taxation System**

Exploring the Roots of Systematic Tax Avoidance in Greece Zoi Pittaki, 2021-07-01 This book explores the interaction between business and the system of taxation in Greece from the mid 1950s up to 2008, the year that marked the eve of the economic crisis. The country faced in the aftermath of the international financial crisis of 2007. The evidence presented confirms William Baumol's point about how taxation affects entrepreneurship. That is, it is shown that Baumol was right when indicating that problematic tax rules can lead to unproductive forms of entrepreneurship such as tax evasion. However, the focus here is on aspects of the system of taxation that Baumol's model, examining solely tax rates and levels of taxation, neglected. This book shows that as far as Greek entrepreneurship is concerned, the adverse effects of the system of taxation came mostly from a series of issues that increased its perceived unfairness and illegitimacy. The way that the tax system functioned also increased uncertainty, which was anything but beneficial for investing in business. This book contributes to the current debates about the Greek economy and the causes of the crisis affecting the country. In this respect, it also throws light on the big issue of tax evasion burdening the country's fiscal system. However, the research also belongs to the wider literature examining entrepreneurship from a business history perspective to that focusing on the relation between entrepreneurship and institutions, to the debates regarding the ways entrepreneurship is affected by the socio-political and economic environment, but also to institutional analyses about taxation.
