Wounded City Nancy Foner, 2005-08-25 New York has eight million deeply personal and unique stories of pain and perseverance from September 11 2001 But the toll of tragedy is greater than the anguish it inflicts on individuals communities suffer as well In *Wounded City* editor Nancy Foner brings together an accomplished group of scholars to document how a broad range of communities residential occupational ethnic and civic were affected and changed by the World Trade Center attacks Using survey data and in depth ethnographies the book offers sophisticated analysis and gives voice to the human experiences behind the summary statistics revealing how the nature of these communities shaped their response to the disaster Sociologists Philip Kasinitz Gregory Smithson and Binh Pok highlight the importance of physical space in the recovery process by comparing life after 9 11 in two neighborhoods close to ground zero Tribeca which is nestled close to the city's downtown and Battery Park City which is geographically and structurally separated from other sections of the city Melanie Hildebrandt looks at how social solidarity changed in a predominantly Irish middle class community that was struck twice with tragedy the loss of many residents on 9 11 and a deadly plane crash two months later Jennifer Bryan shows that in the face of hostility and hate crimes many Arab Muslims in Jersey City stressed their adherence to traditional Islam Contributor Karen Seeley interviews psychotherapists who faced the challenge of trying to help patients deal with a tragedy that they themselves were profoundly affected by Economist Daniel Beunza and sociologist David Stark paint a picture of organizational resilience as they detail how securities traders weathered successive crises after evacuating their downtown office and moving temporarily to New Jersey Francesca Polletta and Lesley Wood look at a hopeful side of a horrible tragedy civic involvement in town meetings and public deliberations to discuss what should be done to rebuild at ground zero and help New Yorkers create a better future in the footprints of disaster New Yorkers suffered tremendous losses on September 11 2001 thousands of lives billions of dollars the symbols of their skyline and their peace of mind But not lost in the rubble of the World Trade Center were the residential ethnic occupational and organizational communities that make up New York's rich mosaic *Wounded City* gives voice to some of those communities showing how they dealt with unforeseen circumstances that created or deepened divisions yet at the same brought them together in suffering and hope It is a unique look at the aftermath of a devastating day and the vitality of a diverse city A Russell Sage Foundation September 11 Initiative Volume

Movement Nicole Gelinas, 2024-11-05 A gripping account of how the automobile has failed NYC and how mass transit and a revitalized streetscape are vital to its post pandemic recovery In 1969 as all students of New York City history think they have learned master builder Robert Moses lost his long battle to urbanist Jane Jacobs over his planned Lower Manhattan Expressway The ten lane elevated expressway would have sliced across SoHo and Little Italy demolishing historic buildings and displacing thousands of families and businesses Jacobs and her neighbors defeated Moses and as a result New York became the only major American city with no interstate highway running through its core Like many global

cities though New York had spent fifty years during the first half of the twentieth century trying and failing to tame its heavily populated landscape to fit the private automobile New York has now spent more than fifty years trying to undo those mistakes wresting back city space for people not cars Movement New York's Long War to Take Back Its Streets from the Car chronicles the earlier less known battles that preceded the cancellation of the Lower Manhattan Expressway Jacobs became an example for generations of urban planners but whose example did Jacobs emulate in an earlier victory that saved Washington Square Park Moses may serve handily as New York's uber villain now but who before him was responsible for destroying a critical part of New York's transit system A well respected urban writer who has focused on New York's transportation system for more than a decade author Nicole Gelinas resumes the story where Robert Caro's landmark *The Power Broker* ended Movement explores how in the half century leading up to the COVID 19 pandemic New York's re-embrace of its mass transit system and a livable streetscape helped save the city Gelinas tackles the 1970s environmental movement the 1980s rebuilding of the subways and more contemporary battles from Mayor Bloomberg's push for more pedestrian plazas and bike lanes in the early 2000s to transportation advocates protests to prevent traffic deaths in the Mayor de Blasio era of the 2010s to how New York's stewardship of its streets and subways have played a critical role during the 2020 pandemic and subsequent recovery Introducing a cast of transportation heroes to rival Jane Jacobs Shirley Hayes Hazel Henderson Richard Ravitch Nilka Martell and puncturing the myth of Moses as New York's anti hero Movement explores how New York City has helped redefine what it means to be a global city not a place that is easy to drive through but a place where people can take transit walk and bike to work to school or just for fun

Transport and Pandemic Experiences Maria Attard, Corinne Mulley, 2022-10-17 Transport and Pandemic Experiences discusses how the accumulated knowledge of the pandemic needs to be capitalised in our fight against climate change and helps to identify future research imperatives for better understanding and greater policy transferability *The Routledge Handbook of Public Transport* Corinne Mulley, John Nelson, Stephen Ison, 2021-05-12 The Routledge Handbook of Public Transport is a reference work of chapters providing in depth examination of the current issues and future developments facing public transport Chapters in this book are dedicated to specific key topics identifying the challenges therein and pointing to emerging areas of research and concern The content is written by an international group of expert contributors and is enhanced through contributions from practitioners to deliver a broader perspective The Handbook deals with public transport policy context modal settings public transport environment public transport delivery issues smart card data for planning and the future of public transport This comprehensive reference work will be a vital source for academics researchers and transport practitioners in public transport management transport policy and transport planning

New York City , The Care of Foreigners Eram Alam, 2025-10-14 Why did South Asian physicians become essential to US health care starting in 1965 For more than 60 years the United States has trained fewer physicians than it needs relying instead on the economically expedient option of

soliciting immigrant physicians trained at the expense of other countries In *The Care of Foreigners* Eram Alam examines this migratory dynamic that began during the Cold War The passage of the Hart Celler Immigration and Nationality Act of 1965 expedited the entry of foreign medical graduates FMGs from postcolonial South Asia and sent them to provide care in shortage areas throughout the United States Although this arrangement was conceived as temporary over the decades it has become a permanent fixture of the medical system with FMGs comprising at least a quarter of the physician labor force since the act became law This cohort of practitioners has not been extensively studied rendering the impacts of immigration and foreign policy on the everyday mechanics of US health care obscure Alam foregrounds global dynamics embedded in the medical system to ask how and why Asian physicians and especially practitioners from South Asia have become integral to US medical practice and ubiquitous in the US public imaginary Drawing on transcripts of congressional hearings medical scientific and social scientific literature ethnographies oral histories and popular media Alam explores the enduring consequences of postcolonial physician migration Combining theoretical and methodological insights from a range of disciplines this book analyzes both the care provided by immigrant physicians as well as the care extended to them as foreigners
