Chapter 1

The Systems Analyst and IS Development

Chapter 1: The Systems Analyst and Information Systems Development

Answer to Your Turn 1-1: Being an Analyst

Student answers will vary, depending on their preferences regarding being a: 1) systems analyst, 2) business analyst, 3) requirements analyst, 4) infrastructure analyst, or 5) change management analyst. Verify that the student has correctly associated the skills needed with the type of analyst for which they aspire and that the student has created a plan to acquire those skills. The roles and the names used to describe them may vary from organization to organization.

Answer to Your Turn 1-2: Implementing a Satellite Data Network

While answers may vary, answers might include the following:

1. A Cost-Benefit analysis, along with other financial processes (ROI, etc.) would certainly reveal that a just-in-time (JIT) inventory can reduce inventory costs and increase revenue. A standard communication line, encrypted or not, would not be able to handle the high bandwidth needed for data, voice and video transmissions.
2. A competitor would be able to narrow the gap by adopting the JIT type of inventory management. Voice and video are not necessary to keep the inventory up to date on a timely basis, data transmissions alone would work well.

Answer to Your Turn 1-3: Too Much Paper, Part 1
