Systems We Have Loved:

Systems We Have Loved Eve Meltzer, 2013-07-02 By the early 1960s theorists like L vi Strauss Lacan Foucault and Barthes had created a world ruled by signifying structures and pictured through the grids of language information and systems Artists soon followed turning to language and its related forms to devise a new conceptual approach to art making Examining the ways in which artists shared the structuralist devotion to systems of many sorts Systems We Have Loved shows that even as structuralism encouraged the advent of conceptual art it also raised intractable problems that artists were forced to confront Considering such notable art figures as Mary Kelly Robert Morris Robert Smithson and Rosalind Krauss Eve Meltzer argues that during this period the visual arts depicted and tested the far reaching claims about subjectivity espoused by theorists She offers a new way of framing two of the twentieth century s most transformative movements one artistic one expansively theoretical and she reveals their shared dream or nightmare of the world as a system of signs By endorsing this view Meltzer proposes these artists drew attention to the fictions and limitations of this dream even as they risked getting caught in the very systems they had adopted The first book to describe art s embrace of the world as an information system Systems We Have Loved breathes new life into the study of conceptual art

Each One Another Rachel Haidu, 2023-07-28 A consideration of how contemporary art can offer a deeper understanding of selfhood With Each One Another Rachel Haidu argues that contemporary art can teach us how to understand ourselves as selves how we come to feel oneness to sense our own interiority and to shift between the roles that connect us to strangers those close to us and past and future generations Haidu looks to intergenerational pairings of artists to consider how three aesthetic vehicles shape in painting characters in film and video and roles in dance allow us to grasp selfhood Better understandings of our selves she argues complement our thinking

about identity and subjecthood She shows how Philip Guston's figurative works explore shapes descriptive capacities and their ability to investigate history while Amy Sillman's paintings allow us to rethink expressivity and oneness Analyzing a 2004 video by James Coleman Haidu explores how we enter characters through their interior monologues and she also looks at how a 2011 film by Steve McQueen positions a protagonist's refusal to speak as an argument for our right to silence In addition Haidu examines how Anne Teresa de Keersmaecker's distribution of roles across dancers invites us to appreciate formal structures that separate us from one another while Yvonne Rainer's choreography shows how such formal structures also bring us together Through these examples Each One Another reveals how artworks allow us to understand oneness interiority and how we become fluid agents in the world and it invites us to examine critically and forgivingly our attachments to selfhood A Compendium of the Systems of Divine Truth Jacob Catlin, 1818 **Beyond the Aesthetic and the Anti-Aesthetic** James Elkins, Harper Montgomery, 2013-08-20

Each of the five volumes in the Stone Art Theory Institutes series and the seminars on which they are based brings together a range of scholars who are not always directly familiar with one another's work The outcome of each of these convergences is an extensive and unpredictable conversation on knotty and provocative issues about art This fourth volume in the series *Beyond the Aesthetic and the Anti Aesthetic* focuses on questions revolving around the concepts of the aesthetic the anti aesthetic and the political The book is about the fact that now almost thirty years after Hal Foster defined the anti aesthetic there is still no viable alternative to the dichotomy between aesthetics and anti or nonaesthetic art The impasse is made more difficult by the proliferation of identity politics and it is made less negotiable by the hegemony of anti aesthetics in academic discourse on art The central question of this book is whether artists and academicians are free of this choice in practice in pedagogy and in theory The contributors are Stéphanie Benzaquen J M Bernstein Karen Busk Jepsen Luis Camnitzer Diarmuid Costello Joana Cunha Leal Angela Dimitrakaki Alexander Dumbadze T Brandon Evans Geng Youzhuang Boris Groys Be ta Hock Gordon Hughes Michael Kelly Grant Kester Meredith Kooi Cary Levine Sunil Manghani William Mazzarella Justin McKeown Andrew McNamara Eve Meltzer Nadja Millner Larsen Maria Filomena Molder Carrie Noland Gary Peters Aaron Richmond Lauren Ross Toni Ross Eva Schürmann Gregory Sholette Noah Simblist Jon Simons Robert Storr Martin Sundberg Timotheus Vermeulen and Rebecca Zorach It's Not Personal Susan Best, 2021-06-17 How does something as potent and evocative as the body become a relatively neutral artistic material From the 1960s much body art and performance conformed to the anti expressive ethos of minimalism and conceptualism whilst still using the compelling human form But how is this strange mismatch of vigour and impersonality able to transform the body into an expressive medium for visual art Focusing on renowned artists such as Lygia Clark Marina Abramovic and Angelica Mesiti Susan Best examines how bodies are configured in late modern and contemporary art She identifies three main ways in which they are used as material and argues that these formulations allow for the exposure of pressing social and psychological issues In skilfully aligning this new typology for body art and performance with critical

theory she raises questions pertaining to gender inter subjectivity relation and community that continue to dominate both our artistic and cultural conversation

0 to 9 and the New York Avant-Garde Ross Hair, 2025-09-08 Edited and self published by Bernadette Mayer and Vito Acconci from 1967 to 1969 0 to 9 not only documented some of the most compelling examples of intermedia performance contemporary poetry and post formalist art of the period but also pioneered new ways of conceiving and using the magazine as medium and instrument 0 to 9 and the New York Avant Garde Publishing by Numbers examines how the magazine both responded to and helped shape key developments in New York s often fractious avant garde communities The book pays particular attention to the ways in which Mayer and Acconci foregrounded the material and generic qualities of the magazine and conceived their periodical as a means of generating as well as documenting art and poetry 0 to 9 and the New York Avant Garde considers the ways in which 0 to 9 interacted with other artistic movements and theoretical concerns of the period including cybernetics Pop Art structuralism and information theory Arguing for the enduring importance of the magazine and its unique position in the history of New York s experimental art and literary scenes this study contends that 0 to 9 was both a swan song of 1960s idealism and a precursor for the directions that avant garde art would take in the decades that followed the magazine s demise
