Academy of the Philippines,2005-01-01 A new definition of capacity building is evolving one that is veering away from conventional ideas of organizational engineering As it encompasses the broad environment or system in which social changes occur capacitybuilding has become more complex yet also more rewarding Today some of the buzzwords are empowerment social capital enabling environment Moreover culture values and power relations that influence and motivate organizations and individuals are gaining more attention There is respect and even appreciation now for informal patterns of personal and culture bound organizational behavior the unwritten rules of the game so to speak As well there is the urge to complement not replace indigenous habits and practices All of these are progressively coalescing into a body of concepts called capacity development

Writing History in Late Imperial Russia Frances Nethercott,2019-12-26 It is commonly held that a strict divide between literature and history emerged in the 19th century with the latter evolving into a more serious disciple of rigorous science Yet in turning to works of historical writing during late Imperial Russia Frances Nethercott reveals how this was not so rather she argues fiction lyric poetry and sometimes even the lives of artists consistently and significantly shaped historical enquiry Grounding its analysis in the works of historians Timofei Granovskii Vasilii Klyuchevskii and Ivan Grevs Writing History in Late Imperial Russia explores how Russian thinkers being sensitive to the social cultural and psychological resonances of creative writing drew on the literary canon as a valuable resource for understanding the past The result is a novel and nuanced discussion of the influences of literature on the development of Russian historiography which shines new light on late Imperial attitudes to historical investigation and considers the legacy of such historical practice on Russia today

Trigger, 2003-05-05 This book offers the first detailed comparative study of the seven best documented early civilizations ancient Egypt and Mesopotamia Shang China the Aztecs and adjacent peoples in the Valley of Mexico the Classic Maya the Inka and the Yoruba Unlike previous studies equal attention is paid to similarities and differences in their sociopolitical organization economic systems religion and culture Many of this study's findings are surprising and provocative Agricultural systems technologies and economic behaviour turn out to have been far more diverse than was expected These findings and many others challenge not only current understandings of early civilizations but also the theoretical foundations of modern archaeology and anthropology The key to understanding early civilizations lies not in their historical connections but in what they can tell us about similarities and differences in human behaviour **The Scenes of the Street and Other Essays** Anthony Vidler, 2011-03-15 Anthony Vidler an internationally recognized scholar theorist and critic of modern and contemporary architecture is widely known for his essays on the most pressing issues and debates in the field This volume brings together a collection of such writings including the iconic long unavailable *Scenes of the Street* into one volume *Scenes of the Street and Other Essays* showcases Vidler's engaging and accessible expertise on both contemporary and historic subjects that are relevant to today's concerns *Scenes of the Street* a multi faceted analysis of city planning is one such example other essays in this volume include *Unknown Lands* Guy Debord and the *Cartographies of a Landscape to be Invented* *Transparency and Utopia* *Constructing the Void* from Pascal to Foucault and *The Modern Acropolis* Tony Garnier from *La Cit Antique* to the *Cit Industrielle* Vidler writes in his introduction In the following essays I have interrogated the struggle for an urban architecture in the modern period its critiques and aspirations in the belief that understanding the historical dimensions of the debate will

lead to a renewal of interest in an architecture calculated to redeem if only partially our planet of slums and its deteriorating environment an interest that will not simply reject utopia out of hand or fall back into the complacencies of nostalgia Written during a period in which the debates themselves were actively engaged by critics and supporters of modernism they reflect contemporary issues as they search for their prehistory As historical inquiries they inevitably also engage the transformations in history writing itself since 1970 intellectual responses to the social and political conditions of postwar modernity This fascinating series of essays on issues and figures is an invaluable resource for architects and art historians and enthusiasts of structure and substance alike

Weeding and Sowing Hans Freudenthal, 2007-05-08 A title that sounds like poetry and a subtitle that seems to contradict the title But the subtitle is right and originally it was just the title A strange subtitle isn't it Preface to a Science of Mathematical Education All sciences in their prenatal stage have known this kind of literature only the term used was not Preface but for instance Prolegomena which means the same though it sounds less provisional In fact such works were thicker than the present one by up to ten times There is much more that can be said about a science before it comes into being than after with the first results comes modesty This is the preface to a book that will never be written not by me nor by anybody else Once a science of mathematical education exists it will get the preface it deserves Nevertheless this preface or what for honesty's sake I have labelled so must fulfil a function the function of accelerating the birth of a science of mathematical education which is seriously impeded by the unfounded view that such already exists Against this view I have to argue it rests on a wrong estimation both over and under estimation at the same time of what is to be considered as science

WORLD SOCIOLOGY Dr. Krishan Kumar, 2022-03-15 Sociological theories are the core and underlying strength of the discipline They guide researchers in their studies They also guide practitioners in their intervention strategies And they will provide you with a basic understanding of how to see the larger social picture in your own personal life A Theory is a set of interrelated concepts used to describe explain and predict how society and its parts are related to each other The metaphor used for to illustrate the usefulness of a theory is what it is called the goggles metaphor Goggles are a set of interrelated parts that help us see things more clearly Goggles work because the best scientific components work together to magnify enlarge clarify and expand to our view of the thing we are studying Theories are sets of interrelated concepts and ideas that have been scientifically tested and combined to magnify enlarge clarify and expand our understanding of people their behaviours and their societies Without theories science would be a futile exercise in statistics You can see the process by which a theory leads sociologist to perform a certain type of study with certain types of questions that can test the assumptions of the theory Once the study is administered the findings and generalizations can be considered to see if they support the theory If they do similar studies will be performed to repeat and fine tune the process If the findings and generalizations do not support the theory the sociologist rethinks and revisits the assumptions they made

The Imperial Russian Project Alfred J. Rieber, 2018-01-18 A pioneer in the field of Russian and Soviet

studies in the West Alfred J Rieber s five decade career has focused on increasing our understanding of the Russian Empire from Peter the Great to the coming of the First World War The Imperial Russian Project is a collection of Rieber s lifetime of work focusing on three interconnected themes of this time period the role of reform in the process of state building the interaction of state and social movements and alternative visions of economic development This volume contains Rieber s previously published classic essays edited and updated as well as newly written works that together provide a well integrated framework for reflection on this topic Rieber argues that Russia s style of autocratic governance not only reflected the personalities of the rulers but also the challenges of overcoming economic backwardness in a society lacking common citizenship and a cohesive ruling class The Imperial Russian Project reveals how during the nineteenth century the tsar was obliged to operate within a changing and more complex world reducing his options and restricting his freedom of action
