Remembering Women's Activism Sharon Crozier-De Rosa, Vera Mackie, 2018-09-25 *Remembering Women's Activism* examines the intersections between gender politics and acts of remembrance by tracing the cultural memories of women who are known for their actions. Memories are constantly being reinterpreted and are profoundly shaped by gender. This book explores the gendered dimensions of history and memory through nation based and transnational case studies from the Asia Pacific region and Anglophone world. Chapters consider how different forms of women's activism have been remembered: the efforts of suffragists in Britain, the USA and Australia to document their own histories and preserve their memory; Constance Markievicz and Qiu Jin, two early twentieth century political activists in Ireland and China respectively; the struggles of women workers and the movement for redress of those who have suffered militarized sexual abuse. The book concludes by reflecting on the mobilization of memories of activism in the present. Transnational in scope and with reference to both state centred and organic acts of remembering including memorial practices, physical sites of memory, popular culture and social media. *Remembering Women's Activism* is an ideal volume for all students of gender and history, the history of feminism and the relationship between memory and history.

Tropes of Intolerance Peter Rose, 2020-12-30 *Tropes of Intolerance* is a Baedeker of bigotry, a short course on xenophobic racism and populist nationalism, both enduring threats to the social fabric of democratic societies. Each chapter is a self contained commentary and a building block. In the first the author considers the concepts of pride and prejudice and discusses patterns of discrimination and strategies of resistance. This is followed by an illustrated consideration of the emblems of enmity: words, signs, symbols and other verbal and visual expressions of both chauvinism and intolerance. Linking the first two, the third chapter explores the nature of American Nativism and its contemporary expression. This is followed by an assessment of the exploitation of anxiety among particularly vulnerable sectors of society by skillful manipulative leaders and their agents and the exacerbation of social divisions by the use of stereotyping, stigmatizing and labeling. Chapter Five, *Trumped Up*, narrows the focus to the present day, the president himself and his exacerbation of polarizing particularism. A sixth chapter examines two of the most malignant ideologies: resurgent anti-Semitism and the rise of Islamophobia, bringing readers full circle. In addition to a brief Coda and a glossary of key terms related to the principal topic, there is a post-election Afterword written in late November 2020.

British Cultural Identities Mike Storry, Peter Childs, 2016-11-25 *British Cultural Identities* assesses the degree to which being British impinges on the identity of the many people who live in Britain, analysing contemporary British identity through the various and changing ways in which people who live in the UK position themselves and are positioned by their culture today. This new edition is updated to include discussion of key events and societal shifts such as the 2016 Brexit referendum, the 2015 British General Election, the growing emphasis on devolution, the 2012 Olympic Games, the new generation of royals, UKIP and the Euro crisis, the response to fundamentalism and the proliferation of social networking. Using examples from contemporary

and popular culture chapters cover a range of intersecting themes including place and environment education work and leisure gender sex and the family youth culture and style class and politics ethnicity and language religion heritage Accessible in style illustrated with photographs tables and timelines and containing discussion questions cultural examples and suggestions for further resources at the end of each chapter *British Cultural Identities* is the perfect introductory text for students of contemporary British society

[The Sociocultural Context of Psychosocial Interventions](#) Francisco José Eiroa-Orosa, Tim Lomas, Michael Rowe, 2018-12-06 Across diverse academic fields scholars and practitioners are engaged in developing interventions to promote outcomes like health and quality of life Indeed such is the apparent efficacy of such interventions that there are many policy led initiatives to implement these at national and international scales However few scholars or practitioners have thought in any systematic and critical way about the importance of contextualizing these interventions i e considering how the impact of such interventions may be affected and mediated by specific sociocultural factors from gender to ethnicity and socio economics The aim of the Research Topic The Sociocultural Context of Psychosocial Interventions was to address this lacuna As such we tried to help bringing a more contextual mindset to the implementation of health and wellbeing interventions This may help to shift the way such interventions are designed and implemented both at a granular local level i e influencing individual practitioners and at a large scale macro level e g influencing policy makers Themes within this Research Topic have concerned both macro sociocultural as well as meso and micro layers and the peculiarities of implementing real world research based on these levels There has been room for physical and mental health for family relationships for educational contexts and even for the effects of crime Some works have included interesting methodological discussions on the integration of different ecological

layers or the modal distribution of our interests For us it has been very important to work giving a greater diffusion to these issues since considering psychosocial interventions in the context in which they occur goes beyond an epistemological or methodological discussion Rather these considerations seriously affect the ability of practitioners to really reach the people who need their interventions listening to their needs and respecting their preferences For the editors of this book then the contextualization of interventions means considering the people who receive them as full citizens immersed in complex societies where factors such as social justice and health or well being do not float apart in space but affect each other dialectically We therefore think that the duty of both academics and practitioners is not to forget that it is as important to evaluate the direct effect of our interventions as the influence we have in the society as a whole when we carry them out We hope you enjoy reading these works and that their dissemination stimulates new lines of research committed to both good practise and social transformation
