There is a growing body of research that suggests that the use of technology in the classroom can improve student learning. This research is based on a variety of studies that have shown that students who use technology in the classroom are more engaged, motivated, and achieve higher scores on tests than students who do not use technology. This research also suggests that technology can help students learn at their own pace and in a way that is most effective for them. As a result, many educators are beginning to use technology in their classrooms, and this trend is expected to continue in the future.
