Energy Modelling and Fairness for Efficient Mobile Communication Ekhiotz Jon Vergara Alonso, 2016-03-01 Energy consumption and its management have been clearly identified as a challenge in computing and communication system design where energy economy is obviously of paramount importance for battery powered devices This thesis addresses the energy efficiency of mobile communication at the user end in the context of cellular networks We argue that energy efficiency starts by energy awareness and propose EnergyBox a parametrised tool that enables accurate and repeatable energy quantification at the user end using real data traffic traces as input EnergyBox offers an abstraction of the underlying states for operation of the wireless interfaces and allows to estimate the energy consumption for different operator settings and device characteristics The tool is used

throughout the thesis to quantify and reveal inefficient data communication patterns of widely used mobile applications We consider two different perspectives in the search of energy efficient solutions From the application perspective we show that systematically quantifying the energy consumption of design choices e g communication patterns protocols and data formats contributes to a significantly smaller energy footprint From the system perspective we devise a cross layer solution that schedules packet transmissions based on the knowledge of the network parameters that impact the energy consumption of the handset These attempts show that application level decisions require a better understanding of possible energy apportionment policies at system level Finally we study the generic problem of determining the contribution of an entity e g application to the total energy consumption of a given system e g mobile device We compare the state of the art policies in terms of fairness leveraging cooperative game theory and analyse their required information and computational complexity We show that providing incentives to reduce the total energy consumption of the system as part of fairness is tightly coupled to the policy selection Our study provides guidelines to select an appropriate policy depending on the characteristics of the system

Dawes,2010-08-04 This book will provide you with a comprehensive guide to developing games for both the Windows Mobile platform and the Windows Phone using the industry standard programming languages C and VB NET You will be walked through every aspect of developing for the Windows Mobile platform from setting up your development environment for the first time to creating advanced 3D graphics Finally you ll learn how you can make your applications available to others whether distributing for free or selling online Using extensive code samples throughout you ll gather all the information needed to create your own games and distribute them successfully for others to enjoy Aimed primarily at C developers almost everything in the book can be used in VB NET too For those areas where this is not the case workarounds are suggested so that VB NET developers are still able to use the techniques described *Android Tips, Tricks & Apps* Imagine Publishing,

Fashion Branding and Communication Byoungho Jin,Elena Cedrola,2017-04-26 This second volume in the Palgrave Studies in Practice Global Fashion Management series focuses on core strategies of branding and communication of European luxury and premium brands Brand is a critical asset many firms strive to establish maintain and grow It is more so for fashion companies when consumers purchase styles dreams and symbolic images through a brand The volume starts with an introductory chapter that epitomizes the essence of fashion brand management with a particular emphasis on emerging branding practices challenges and trends in the fashion industry The subsequent five cases demonstrate how a family workshop from a small town can grow into a global luxury or premium brand within a relatively short amount of time Scholars and practitioners in fashion retail branding and international business will learn how companies can establish a strong brand identity through innovative strategies and management **Media and Digital Management** Eli M.

Noam,2019-01-23 Being a successful manager or entrepreneur in the media and digital sector requires creativity innovation

and performance It also requires an understanding of the principles and tools of management Aimed at the college market this book is a short foundational volume on media management It summarizes the major dimensions of a business school curriculum and applies them to the entire media media tech and digital sector Its chapters cover in a jargonless non technical way the major functions of management First creating a media product the financing of projects and the management of technology HR production operations intellectual assets and government relations Second harvesting the product created market research marketing pricing and distribution And third the control loop media accounting and strategy planning In the process this book becomes an indispensable resource for those aiming for a career in the media and digital field both in startups and established organizations This book is designed to help those aiming to join the media and digital sector to become creative managers and managerial creatives It aims to make them more knowledgeable less blinded by hype more effective and more responsible *Daily Graphic* Ransford Tetteh,2010-07-08 **The New Digital Era** Simon Grima,Ercan Özen,Hakan Boz,2022-09-15 The New Digital Era s two volumes highlight the new social and economic policies that are needed to balance the effects on social and economic life and prevent possible conflicts between individuals and societies in the wake of the COVID 19 pandemic and digitalisation Digital Forensics and Cyber Crime Marcus K. Rogers,Kathryn C. Seigfried-Spellar,2013-10-01 This book contains a selection of thoroughly refereed and revised papers from the Fourth International ICST Conference on Digital Forensics and Cyber Crime ICDF2C 2012 held in October 2012 in Lafayette Indiana USA The 20 papers in this volume are grouped in the following topical sections cloud investigation malware behavioral law mobile device forensics and cybercrime investigations *Mobile Telecommunications in a High-Speed World* Peter Curwen,Jason Whalley,2016-07-22 Mobile Telecommunications in a High Speed World tells the story of 3G and higher speed mobile communication technologies Over ten years have passed since the first third generation 3G licences were awarded following debates about the merits of auctions versus beauty contests then nothing much happened More licences were issued a few roll outs commenced and everyone began to think it had all been a horribly expensive mistake That may still turn out to be the case but in the meantime there have been massive developments in terms of the number of licences and launches worldwide in the range of services that can be accessed in the range of devices that can be used to access them in operator strategies etc Even the technology has improved considerably with 4G now under discussion Much of this story has been chronicled largely on the Internet but the information is in tens of thousands of bits and pieces and a large part of it is either misleading or just plain wrong Here Peter Curwen and Jason Whalley introduce the outcomes of research that has involved the compilation of a unique database which details every licence and launch worldwide involving 3G The authors discuss the structure of the industry and the strategic behaviour of operators as well as the social consequences of the spread of 3G They examine the role of new entry upon competition and present analysis of the main operators involved the development of handsets and especially smartphones A number of country case studies are included

This comprehensive and up to date volume includes a number of country studies and is written by two of the world s foremost researchers on this industry Mobile Telecommunications in a High Speed World will serve the needs of students academics and those involved or contemplating involvement with the telecoms industry Why pay thousands of dollars to consultancies to separate the wheat from the chaff with respect to 3G when you can read this book

Graphic Showbiz Nanabanyin Dadson,2010-07-08 **Business Week** ,2008 *Mobile Tech Report 2014* John R. Roberts,2014-01-10 If you read technology news you ll notice it s not just a story of amazing new product introductions or even that plus copycat product introductions All the usual aspects of business are there fierce competition new contenders old survivors great ideas but business failures mediocre ideas that somehow seem to succeed and prosper As a reporter commentator and blogger on mobile technology I ve collected what happened in the industry in 2013 and make predictions on what will and won t happen in 2014 You can read what did happen in the mobile technology in 2013 Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement This way you can dive into any detail level you desire read my news feed for the overview or follow the related web link to the longer article History is moving so fast now that it is all recorded electronically but I m surprised no one else has collected it and presented it for consideration Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed It s often overlooked that the technology industry is an industry By that I mean its main concerns are profit and growth As consumers we love the new products and unique abilities we are gaining from technology but it is a business akin to any other trying to seduce us to pry money out of our wallets So I cover the horse race aspect of the business who s up who s down Is that changing Is that likely to change The longer implications of what the technology industry is doing are vast and social We are moving to an always on always connected society where we can communicate with someone instantly and find an answer to any question quickly The entire database of human knowledge is now available in the palm of your hand whenever you desire it Everything is there the good the bad right and wrong hate and love music and noise We are obsessed with technology not in and of itself but as a means to an end Technology is the means to satisfy our curiosity or even our desire for self expression We are taking photos machine gun style with our smartphones and choose the few to share As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years He gave some boring answer about Moore s Law but the real answer is that computers are in their teenage years They are growing and growing They will not always do so So too the technology industry is in a state of rapid change I see the shift to smaller devices as a new paradigm smashing some businesses and

growing others into giants Their stories are here in the news In short here are predictions for what won't and will happen in 2014 for the mobile technology industry breakdowns of marketshare figures on the horse race aspect of the business chapters on Apple Samsung Google Microsoft Nokia Blackberry Amazon Yahoo news about social media giants Facebook Twitter Google LinkedIn Foursquare SnapChat and the carriers themselves Verizon AT T Sprint and T Mobile You can also review my 2013 mobile predictions and see my track record on predictions Finally there are some essays on how all this mobile tech is figuring into our lives I've divided the news into the subjects it covers but also put in the appendix all the news as it came out in chronological ordering You can read the firehose of events in the appendix or just read about one topic at a time in the earlier chapters Table of Contents Preface Introduction Chapter 1 2014 Predictions Chapter 2 Mobile Marketshare Chapter 3 Apple Chapter 4 Samsung Chapter 5 Google Chapter 6 Microsoft Chapter 7 Nokia Chapter 8 Blackberry Chapter 9 Amazon Chapter 10 Social Media Chapter 11 Yahoo Chapter 12 Carriers Chapter 13 2013 Predictions Chapter 14 Essays Appendix

Human and Automatic Speaker Recognition over Telecommunication Channels Laura Fernández Gallardo, 2015-08-17 This work addresses the evaluation of the human and the automatic speaker recognition performances under different channel distortions caused by bandwidth limitation codecs and electro acoustic user interfaces among other impairments Its main contribution is the demonstration of the benefits of communication channels of extended bandwidth together with an insight into how speaker specific characteristics of speech are preserved through different transmissions It provides sufficient motivation for considering speaker recognition as a criterion for the migration from narrowband to enhanced bandwidths such as wideband and super wideband

Making Maps, Second Edition John Krygier, Denis Wood, 2011-04-15 Acclaimed for its innovative use of visual material this book is engaging clear and compelling exactly how an effective map should be Nearly every page is organized around maps and other figures many in full color that illustrate all aspects of map making including instructive examples of both good and poor design choices The book covers everything from locating and processing data to making decisions about layout symbols color and type Readers are invited to think critically about both the technical features and social significance of maps as they learn to create better maps of their own New to This Edition Extensively revised and expanded core chapters on map design An annotated map design exemplar is used to show how the concepts in each chapter play out on an actual map Updated to reflect current technological developments Larger size and redesigned pages make the book even more user friendly

Knowledge Engineering: Practice and Patterns Philipp Cimiano, H. Sofia Pinto, 2010-11-18 Knowledge Management and Knowledge Engineering is a fascinating old of re 1 search these days In the beginning of EKAW the modeling and acquisition of knowledge was the privilege of or rather a burden for a few knowledge engineers familiar with knowledge engineering paradigms and knowledge representation formalisms While the aim has always been to model knowledge declaratively and allow for reusability the knowledge models produced in these early days were typically used in single and very specific applications and rarely changed Moreover

these models were typically rather complex and they could be understood only by a few expert knowledge engineers This situation has changed radically in the last few years as clearly indicated by the following trends The creation of even formal knowledge is now becoming more and more collaborative Collaborative ontology engineering tools and social software platforms show the potential to leverage the wisdom of the crowds or at least of the many to lead to broader consensus and thus produce shared models which qualify better for reuse A trend can also be observed towards developing and publishing small but 2 3 4 high impact vocabularies e g FOAF DublinCore GoodRelations rather than complex and large knowledge models
