

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

Clarkson, 2015-12-17 Contemporary concerns in mathematics education recognize that in the increasingly technological and globalized world with concomitant change in population demographics e g immigration urbanization and a change in the

status of languages e.g. English as a dominant language of science and technology multilingualism in classrooms is a norm rather than an exception. Shifts in perspective also view language not simply as an instrument for cognition with all learners equipped with this instrument in service of learning although clearly in the classroom that remains of importance. Rather it is now also being acknowledged that language use is inherently political so that the language that gets official recognition in the classroom is invariably the language of the powerful elite or the dominant societal language or in the case of post colonial contexts the language of the colonisers. From this socio political role of language in learning quite different issues arise for teaching learning and curriculum for linguistically marginalized learners than that of cognition e.g. immigrants second language learners etc. Policies on language in education are being considered and re-considered with specific reference to mathematics teaching and learning. Given the policy environment globally the proposed publication is timely. This edited collection draws on recent emerging insights and understandings about the approaches to improving policy and practice in mathematics education and mathematics teacher education in multilingual settings. It presents and discusses critically examples of work from a range of contexts and uses these examples to draw out key issues for research in education in language diverse settings including teaching learning curriculum and fit these with appropriate policy and equity approaches. With contributions from all over the world especially novice researchers in low income countries this book is a valuable resource for courses in Mathematics Education and related social sciences both at the graduate and undergraduate levels as well as for students of international development.

Professional Support Beyond Initial Teacher Education Anna Elizabeth Du Plessis, 2019-08-26 This book investigates the professional learning needs of teachers beyond initial teacher education focusing on teachers in complex teaching positions such as out of field teaching practices. The information presented here will help to improve professional learning strategies while also offering an in depth understanding of teachers' needs, leaders' perceptions and what complex teaching situations mean for teachers' professional learning and development. Further Du Plessis shares the perceptions and lived experiences of teachers, parents, leaders and students as key stakeholders in quality teaching and learning environments. In light of new evidence informed findings on the out of field phenomenon and continuing professional learning Du Plessis puts forward strategies that will enhance the effectiveness of professional learning and development programs while also fostering improved decision making and policy development. In brief Du Plessis focuses on the impact that complex teaching situations have on teachers' unique needs, the support that is provided and the influence of the out of field phenomenon on teachers' responses to continuing professional learning and development programs.
