

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

Systemic School Improvement Interventions in South Africa Godwin Khosa, 2014-04-14 Looking at two smaller scale systemic school improvement projects implemented in selected district circuits in the North West and Eastern Cape by partnerships between government JET Education Services and private sector organisations this book captures and reflects on the experiences of the practitioners involved The Systemic School Improvement Model developed by JET to address an identified range of interconnected challenges at district school classroom and household level is made up of seven components In reflecting on what worked and what did not in the implementation of these different components the different chapters set out some of the practical lessons learnt which could be used to improve the design and implementation of similar education improvement projects Many of the lessons in this field that remain under recorded to date relate to the step by step processes followed the relationship dynamics encountered at different levels of the education system and the local realities confronting schools and districts in South Africa s rural areas Drawing on field data that is often not available to researchers the book endeavours to address this gap and record these lessons It is not intended to provide an academic review of the systemic school improvement projects It is presented rather to offer other development practitioners working to improve the quality of education in South African schools an understanding of some of the real practical and logistical challenges that arise and how these may be resolved to take further school improvement projects forward at a wider district provincial and national scale

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world

South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Assessing Academic Literacy in a Multilingual Society Albert Weideman,John Read,Theo du Plessis,2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience

Learner Performance in South Africa Charles Edward Wickens Simkins,Andrew Paterson,2005 South Africa has done well to systematically expand its educational system and to lengthen the schooling experience of successive learner cohorts But the

quality of the output from the school system has been questioned In seeking to identify the reasons for this it is important to relate educational outputs competencies as measured for instance by examinations or standardized tests to inputs Determining the relative contributions of the inputs of the school the household and the individual learner to educational outputs is not straightforward particularly since very little educational production function analysis has been undertaken in South Africa Until recently no South African school data has incorporated test results school characteristics and information on the household circumstances of individual learners necessary for this kind of analysis However the results from a survey of a sample of schools involved in the large scale Quality Learning Project QLP funded by the Business Trust have yielded such data The QLP data set offers a new analytical opportunity to address the question What are the effects of social and economic variables on educational outcomes in the QLP schools *South African Journal of Psychology* ,1998 **XXX**
