The Politics of Space Security James Clay Moltz, 2023-05-25 Updated third edition An excellent work This history may be the best space summary currently in publication Journal of Military and Strategic Studies For more than sixty years countries have conducted military and civilian activities in space often for competitive purposes But they have not yet fought in this environment This book examines the international politics of the space age from 1957 to the present the reasons why strategic restraint emerged among the major military powers and how recent trends toward weaponization may challenge prior norms of conflict avoidance James Clay Moltz analyzes the competing demands of national interests in space against the shared interests of all spacefarers in preserving the safe use of space in the face of emerging threats such as man made orbital debris This new edition offers analysis of the 2011 to 2018 period including the second term of President Obama and the beginning of the Trump administration Focusing on great power competition and cooperation as well as questions related to the sustainability of current and future national space policies The Politics of Space Security is an authoritative history of the space age Praise for previous editions Most of this well written study is blessedly free from jargon a particularly valuable contribution to the space security debate given both the wide range of the historical dimensions and the incisive quality of its analysis Issues in Science and Technology An impressive and timely contribution to security studies it is difficult to find fault with this thoughtful and comprehensive volume Review of Policy Research      *The Economics of Defense Industry* Thomas-Durell Young, 2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly

skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis      The Statesman's Yearbook 2025 Palgrave Macmillan,2025-01-10 Now in its 161st edition The Statesman s Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions      **Federal Yellow Book** ,1989      *Air transport - tourism nexus: A destination management perspective* Maya Georgieva Ivanova,2017-06-18 The aim of current research monograph is to provide a deeper view of the complex relationship between the air transport and tourism industries The adopted point of view a destination perspective enables one to go into a more detailed exploration of the topic and to consider issues that usually remain invisible at the strategic managers level The elaborated destination analysis framework and the identification of common points between aviation and tourism set the groundwork for further examination of the air transport tourism nexus Therefore the book would be useful both for students and researchers in the field of tourism hospitality and destination management and for practitioners and destination management representatives who may find interesting insights and ideas for improvement The monograph would be suitable also for managers and representatives from the air transport industry by providing them with the other point of view that of the local tourist destination to consider in their strategic growth and negotiation process
