Space Curriculum And Learning International Perspectives On Curriculum Richard Edwards:

Space, Curriculum and Learning David Scott, 2006-01-01 In recent years there has been increasing interest in issues of space and spatiality in the social sciences and humanities generally if less so in the study of education This relative lack of interest is surprising given the importance of space and time in the organization of teaching learning and research For instance the timetable and project timeline are central to the organization of learning and knowledge production whether in schools colleges or universities Classrooms workshops and laboratories have different spatial layouts which support certain forms of interaction and communication When we add to this the increasing distances across which knowledge understanding and competence are being distributed through the use of information and communications technologies the fact that issues of space have not been taken up seems more than an oversight This relative lack of interest in space becomes even more surprising when one considers the extensive use of spatial metaphors in the discussion of education and pedagogy For instance the notions of open distance and distributed learning and student centredness border crossing and communities of practice all have a spatial dimension to them Notions of a spiral curriculum act as a spatial imaginary Indeed some metaphors such as flexibility seem to be suggestive of the possibility that all constraints of space and time can be conquered in the provision of learning opportunities throughout life This collection of chapters from researchers around the world attempts to address these issues to examine the significance of space for curriculum learning and identity

Space, Curriculum, and Learning Richard Edwards, Robin Usher, 2003-01-01 In recent years there has been increasing interest in issues of space and spatiality in the social sciences and humanities generally if less so in the study of education This lack of interest is surprising given the importance of space and time in the organization of teaching and research This collection examines the significance of space

Reading Across International Boundaries Roger Openshaw, Janet Soler, 2007-06-01 Reading Across International Boundaries edited by Roger Openshaw and Janet Soler clearly demonstrates these broader characteristics of debates about the teaching of reading It sets the educational issues firmly in the context of the social cultural and political dynamics that inform and animate them and give them their meaning It does so by setting out to understand their historical and comparative dimensions Establishing the historical context highlights the origins and also the longevity of the problems and conflicts that are now widely familiar The comparative approach also gives purchase on the wide range of approaches taken to these issues in nations around the world More than this however this collection takes us into the realm of international influences It underlines how debates in this area are not simply national but are international and global in their scale Moreover this is the case not only in relation to the broad fabric of policy debate but also in the everyday struggles of pupils parents and teachers in schools classrooms and homes Such an agenda is unsettling and provocative It has the potential to challenge received opinion to hustle preconceptions It may also propose alternative visions for the improvement of teaching in this area that might be taken up and taken seriously in

different localities or even more broadly Most of all it enables us to enrich and broaden our understanding of the learning and the teaching of reading at a time when awareness and vision are sorely needed This collection of articles by leading scholars based in several different countries will be a significant contribution to the research field but also a major resource when put to good use by policy makers and practitioners as it should surely be

Complexity Theory and the Politics of Education, 2010-01-01 Complexity theory has become a major influence in discussions about the theory and practice of education This book focuses on a question which so far has received relatively little attention in such discussions which is the question of the politics of complexity The chapters in this book engage with this question in a range of different ways Whereas some contributions make a case for the promotion of complexity in education others focus more explicitly on questions concerning the reduction of complexity in and through education The chapters do so using theoretical historical and empirical arguments paying attention to a range of different educational settings including early childhood education school education post compulsory education lifelong learning and work based education and focusing on different aspects of these practices such as curriculum pedagogy assessment architecture and management Taken together the chapters not only reveal the potential of complexity for engaging with questions about the politics of education in new and different ways They also provide examples of a more reflexive engagement with the politics of complexity in education itself

Learning Outside the Academy Richard Edwards, Jim Gallacher, Susan Whittaker, 2006-11-22 This book weaves together different strands of research in the area of lifelong learning that concentrates particularly on learning in alternative settings and ways such experiential learning and informal and community learning Drawing upon international research the book examines how these strands of research can contribute to each other The contributions to this book are based on material presented at a conference at the Centre for Research in Lifelong Learning UK and they focus on research into key issues of policy and practice in lifelong learning Establishing a wider framework for debate about the meaning and significance of lifelong learning this timely and thought provoking book provides practitioners in the field with a relevant and current discussion on some very important ideas about non formal education

Emerging Approaches to Educational Research Tara Fenwick, Richard Edwards, Peter Sawchuk, 2015-04-08 Emerging Approaches to Educational Research explores four significant framings to do with research on education and learning across the lifecourse It discusses how they are being taken up and utilised as well as their possibilities and limitations complexity science cultural historical activity theory CHAT actor network theory ANT spatiality theories

Rethinking Contexts for Learning and Teaching Richard Edwards, Gert Biesta, Mary Thorpe, 2009-02-06 Drawing upon a variety of academic disciplines this book explores some of the different means of understanding teaching and learning both in and across contexts the issues they raise and their implications for pedagogy and research

Improving Learning in College Roz Ivanic, Richard Edwards, David Barton, Marilyn Martin-Jones, Zoe Fowler, Buddug Hughes, Greg Mannion, Kate Miller, Candice Satchwell, June Smith, 2009-03-04 This book

explores the reading and writing associated with learning subjects across the college curriculum and considers ways of changing teaching practices to enable students to reach their full potential

Rhetoric and Educational Discourse

Richard Edwards, Katherine Nicoll, Nicky Solomon, Robin Usher, 2013-02-01 Educational policy is often dismissed as simply rhetoric and a collection of half truths However this is to underestimate the power of rhetoric and the ways in which rhetorical strategies are integral to persuasive acts Through a series of illustrative chapters this book argues that rather than something to be dismissed rhetorical analysis offers a rich and deep arena in which to explore and examine educational issues and practices It adopts an original stance in relation to contemporary debates and will make a significant contribution to educational debates in elucidating and illustrating the pervasiveness of persuasive strategies in educational practices Rhetoric and Educational Discourse is a useful resource for postgraduate and research students in education and applied linguistics The book will also be of interest to academics and researchers in these fields of study and those interested in discursive approaches to research and scholarship

Nach Foucault Ludwig Pongratz, Michael Wimmer, Wolfgang

Nieke, Jan Masschelein, 2013-03-13 Auch zwei Jahrzehnte nach seinem Tod hat Michel Foucault nichts von seiner inspirierenden und irritierenden Wirkung verloren Zwar tat sich die Pädagogik zunächst schwer mit der Rezeption seiner Diskurs- und Machtanalytischen Studien Inzwischen aber ist an die Stelle anfänglicher Abwehr eine wachsende Resonanz in Erziehungs- und Bildungsphilosophischen Untersuchungen getreten Foucaults eigener Intention folgend verlieren sich die hier versammelten Beiträge nicht in interpretativen Spitzfindigkeiten, aber das richtige Foucault-Verständnis sondern knüpfen an unterschiedliche Studien Foucaults an um den Verstrickungen von Wissen und Macht Subjektivierung und Bildung Erziehung und Gouvernementalität auf die Spur zu kommen

Changing Spaces of Education Rachel Brooks, Alison

Fuller, Johanna Waters, 2012-05-16 In today's modern climate education and learning take place in multiple and diverse spaces Increasingly these spaces are both physical and virtual in nature Access to and use of information and communication technologies and the emergence of knowledge based economies necessitate an understanding of the plurality of spaces such as homes workplaces international space and cyberspace in which learning can take place The spaces of policy making with respect to education are also being transformed away from traditional centres of policy formation towards the incorporation of a wider range of actors and sites These changes coincide with a more general interest in space and spatial theory across the social sciences where notions of simultaneity and diversity replace more modernist conceptions of linear progress and development through time This volume proffers a unique perspective on the transformation of education in the 21st century by bringing together leading researchers in education sociology and geography to address directly questions of space in relation to education and learning This collection of essays examines the changing and diverse spaces and concepts of education occurring simultaneously at different scales and in different parts of the world explores where education and learning take place discusses how spaces of education vary at different stages compulsory schooling tertiary and higher

education adult education and workplace learning inspects the ways in which the meanings attached to education and learning change in different national and regional contexts Changing Spaces of Education is an important and timely contribution to a growing area of concern within the social sciences and amongst practitioners and policy makers reflecting an urgent need to understand the ways in which both education and learning are being reconfigured not just nationally but also internationally and transnationally It is essential reading for final year undergraduates postgraduates and researchers in geography sociology education and policy studies with an aim too of informing policy and practice in this area

The World as a Laboratory Sotiria Grek,Joakim Landahl,Martin Lawn,Christian Lundahl,2024-09-23 This book covers the construction of international education research community in the 1950s 1990s and the growth of its disembedded laboratory i e networks spaces materiality travelling translations The book follows a sociology of science theoretical framework in order to examine the research archive of the Swedish internationally renowned educational scholar Torsten Hus n 1916 2009 The archive reveals the shifting and heterogenous transnational networks that contribute to the development of social science research beyond fixed time and space dimensions and that extends social science beyond individual ideas researchers environments institutions and universities These are practices that create mobilise sustain and challenge relations between actors in innovations knowledge creation and various social activities In other words the archive represents the socio material manifestation not only of the intellectual trajectory of a key education actor but the growing organisation of a whole scientific field at the time
