woven textiles **Advanced Knitting Technology** Subhankar Maity, Sohel Rana, Pintu Pandit, Kunal Singha, 2021-08-22

Advanced Knitting Technology provides complete coverage of the latest innovations and developments in knitting technology including emerging methods as well as the latest best practice for classical processes. Many technologies can be used for the production of cloth such as weaving, knitting, nonwoven and braiding. Knitting methods are being selected for a growing range of applications due to the spectacular properties of knitted fabric such as softer tactile quality, higher stretchability, bulkiness and functional properties that compare favorably with other woven fabrics. Beyond the well known apparel applications, specially designed knitted structures are uniquely suitable for high performance applications like reinforcement for composites, medical implants and geotextiles. This book presents recent advances in knitting technology including structures, properties and applications of knitted fabrics in modern apparel, activewear, composites, medical textiles and geotextiles. With reference to the latest industry practice, testing quality and process control methods for knitting technologies are discussed. Advanced Knitting Technology covers recent advances in knitting technology, properties and performance of knitted structures, their applications in apparel and technical fields. Provides detailed and practical instructions for the sustainable production of knitted textiles including sustainable chemical processing, natural dyeing processes and sustainability analysis methods. Draws on the latest research to discuss the future of knitted apparels and high tech applications of knitted structures as technical textiles. Explores the latest applications of AI and machine learning to the knitting process.

Advanced Weaving Technology Yordan Kyosev, Francois Boussu, 2022-04-02 This book sets the fundamentals of modern weaving at a new level. It contains information for the design of woven structures with complex cross section and multiple layers for modern applications in the way that leading product developers, professors and researchers are using them now. It starts with the classical weaving principles and patterning and extends these quickly to multilayer structures produced with single and multiple weft insertion devices. Woven structures with complex cross section or direct 3D shape. The engineering methods for design of the structures using modern software and modern algorithms are also explained. Finally an overview of different application areas is given. The book is written by the world leading experts in their fields and is prepared as learning tool for people interested in modern weaving. Exercises and end of chapter summaries will help the reader to check his own knowledge. Innovative Jacquard Textile Design Using Digital Technologies Frankie Ng, Jiu
