brain imaging developmental biology genomics etc This topic will be the occasion to combine recent contributions in the field and to identify priorities for future investigations Due to devastating consequences of congenital hypothyroidism the neurodevelopmental consequences of altered thyroid hormone signaling have been extensively studied over the years The discovery of new genetic diseases the concern about the possible neurotoxicity of environmental thyroid hormone disruptors recently renewed the interest for an important research field This Ebook gathers reviews and original data from experts in various disciplines It provides a broad view of ongoing research and outlines key issues for future investigation
