Design Movement Ben Zweibelson, 2023-06-09 This book explains the history and development of the military design movement featuring case studies from key modern militaries. Written by a practitioner, the work shows how modern militaries think and arrange actions in time and space for security affairs and why designers are disrupting challenging and reconceptualizing everything previously upheld as sacred on the battlefield. It is the first book to thoroughly explain what military design is, where it came from, and how it works at deep philosophically grounded levels and why it is potentially the most controversial development in generations of war fighters. The work explains the tangled origins of commercial design and that of designing modern warfare, the rise of various design movements, and how today's military forces largely hold to a Newtonian stylization built upon mimicry of natural science infused with earlier medieval and religious inspirations. Why does our species conceptualize war as such, and how do military institutions erect barriers that become so powerful that efforts to design further innovation require entirely novel constructs outside the orthodoxy? The book explains design stories from the Israel Defense Force, the US Army, the US Marine Corps, the Canadian Armed Forces, and the Australian Defence Force for the first time and includes the theory, doctrine, organizational culture, and key actors involved. Ultimately, this book is about how small communities of practice are challenging the foundations of modern defence thinking. This book will be of much interest to students of military and strategic studies, defence studies, and security studies, as well as design educators and military professionals.

A Manual for American Servicemen in the Arab Middle East William D. Wunderle, 2008-05-01 The Global War on Terrorism (GWOT) has sent US diplomats and troops around the world. In the current security environment, understanding foreign cultures is crucial to defeating adversaries and working with allies. Lt Col William D. Wunderle explains how US soldiers and commanders can look at military interventions from preparation to execution through the lens of cultural awareness while always minding post-conflict stability operations. He also suggests much-needed changes to the traditional intelligence preparation of the battlefield (IPB) and the military decision-making process (MDMP). Fascinating, concise, and timely, this is a must-read for military personnel, the intelligence community, and anyone seeking to grasp the motivations and decision-making styles of people all over the globe.

We'll All Die as Marines Colonel Jim Bathurst USMC (Retired), 2012-12-03 For seventeen-year-old high school dropout Jim Bathurst, the Marine Corps's reputation for making men out of boys was something he desperately needed when he enlisted in March of 1958. What began as a four-year hitch lasted nearly thirty-six years and included an interesting assortment of duty stations and assignments as both enlisted and officer. *We'll All Die As Marines* narrates a story about a young, free-spirited kid from Dundalk, Maryland, and how the Corps captured his body, mind, and spirit. Slowly but persistently, the Corps transformed him into someone whose first love would forever be the United States Marine Corps. It documents not only his leadership service and training but also regales many tales of his fellow Marines that will have the reader laughing, cheering, and at times crying. In this memoir, Bathurst reveals that for him, a former DI who was awarded the Silver Star, Bronze Star Medal, with Combat V, Purple Heart, and a combat commission to

Caldwell,2018-11-09 This groundbreaking book provides the first systematic comparison of America s modern wars and why they were won or lost John D Caldwell uses the World War II victory as the historical benchmark for evaluating the success and failure of later conflicts Unlike WWII the Korean Vietnam and Iraqi Wars were limited but they required enormous national commitments produced no lasting victories and generated bitter political controversies Caldwell comprehensively examines these four wars through the lens of a strategic architecture to explain how and why their outcomes were so dramatically different He defines a strategic architecture as an interlinked set of continually evolving policies strategies and operations by which combatant states work toward a desired end Policy defines the high level goals a nation seeks to achieve once it initiates a conflict or finds itself drawn into one Policy makers direct a broad course of action and strive to control the initiative When they make decisions they have to respond to unforeseen conditions to guide and determine future decisions Effective leaders are skilled at organizing constituencies they need to succeed and communicating to them convincingly Strategy means employing whatever resources are available to achieve policy goals in situations that are dynamic as conflicts change quickly over time Operations are the actions that occur when politicians soldiers and diplomats execute plans A strategic architecture Caldwell argues is thus not a static blueprint but a dynamic vision of how a state can succeed or fail in a conflict **Backbone** Ph.D. Julia Dye,2019-05-22 Noncommissioned officers stand as the backbone of the United States Marine Corps The Corps is among the most lasting institutions in America though few understand what makes it so strong and how that understanding can be applied effectively in today s world In this insightful and thoroughly researched book Julia Dye explores the cadre of noncommissioned officers that make up the Marine Corps system of small unit leadership To help us better understand what makes these extraordinary men and women such effective leaders Dye examines the fourteen leadership traits embraced by every NCO These qualities including judgment enthusiasm determination bearing and unselfishness are exemplified by men like Terry Anderson the former Marine sergeant who spent nearly seven years as a hostage in Beirut John Basilone the hero of the Pacific and many others To assemble this extraordinary chronicle Julia Dye interviewed Anderson and dozens of other Marines mining a rich trove of historical and modern NCO heroes that comprise the Marine Corps astonishing legacy from its founding in 1775 to the present day Providing Legal Services by Members of the Judge Advocate Generals' Corps, S. international actor an actor that at least for a brief period tried to play a different international role than that to which it was accustomed Second the book problematizes the role of international military missions as drivers for change in the security and defence field Several perspectives and levels of analysis are covered from the macro level of strategic discourse to the micro level of the experiences of individual commanders The book focuses upon Sweden and its participation in the international military mission in Afghanistan during 2002 2012 and also contributes to the growing literature evaluating the mission in Afghanistan the security practice which has dominated the security and defence discourse of Western Europe for the last decade
