Sharing Our Intellectual Traces Tracy Bridgeford, Karla Saari Kitalong, Bill Williamson, 2016-11-03 Administrators of academic professional and technical communication PTSC programs have long relied upon lore stories of what works to understand and communicate about the work of program administration Stories are interesting telling engaging and necessary But a discipline focused primarily on stories especially the ephemeral stories narrated at conferences and deliberated at department meetings usually suffice primarily to solve immediate problems and address day to day concerns and activities This edited collection captures some of

those stories and layers them with theoretical perspectives and reflection to enhance their usefulness to the PTSC program administration community at large Like the ephemeral stories PTSC program administrators are accustomed to the stories told in this volume are set within specific institutional contexts that reflect specific institutional challenges They emphasize the intellectual traces the debts the authors owe to those who have informed and transformed their administrative work In so doing this collection creates another conversation albeit a robust diverse and theoretically informed one around which program leaders might define or redefine their roles and re envision their administrative work as the rich complex intellectual engagement that we find it to be This volume asks authors to move beyond a notion of administration as an activity based solely in institutional details and processes In so doing they emphasize theory as they share their reflections on core administrative processes and significant moments in the histories of their associated programs thereby affording opportunities for critical examination in conjunction with practical advice
