Deanship in the Global South Oliver J.J. Seale, 2021-02-08 The university today is a postmodern neo liberal

competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration Education and Leadership Tom Claes, Frank McMahon, David Seth Preston, 2008 This truly international book brings together authors from different regions of the world including North America South Africa Europe Iran and Russia all of whom are concerned with aspects of the challenges involved in the expansion of higher education both in student numbers and areas of study Some are concerned about the loss of guiding principles which steered university education for centuries The traditional purposes of higher education have come under such pressure that we have achieved conflicting models of the university Claes and ambiguity in regard to teaching and research Simons et al For others the problems are at a different stage Contributions from South Africa look at three challenges Can we provide enough places in higher education How do we deal with institutional mergers How do we make staff development effective in a situation in which English is the first language of less than five percent of the staff Young scholars in Russian regions face formidable hurdles in achieving academic careers while the best law graduates in Canada are faced with the ethical dilemma of personal career advancement or social justice Topsakal The problem of integrating nursing into a traditional Irish university is reviewed by Grant while the role of a university in regional development is addressed from a Greek perspective by Papaelias et al The comparative international approach features in research into teacher job satisfaction in India and Iran while McMahon reviews the impact of the Bologna Process **The A to Z of Careers in South Africa** ,2006 **The Food and Financial Crises in Sub-Saharan Africa Origins, Impacts and Policy Implications** M.
