A History of Physics: Phenomena, Ideas and Mechanisms Raffaele Pisano, 2024-09-19

The book gathers several contributions by historians of physics, philosophers of science and scientists as new essays in the history of physics ranging across the entire field related in most instances to the works of Salvo D'Agostino. 1921-2020, one of the field's most prominent scholars since the second half of the past century. A phenomenon is an observable, measurable fact including data, modelling, assumptions, laws. A mechanical phenomenon is associated to equilibrium motion. Are all mechanisms mechanisms of a phenomenon? Scholars with different backgrounds discuss mechanism phenomena from an historical point of view. The book is also devoted to understanding of causations of disequilibrium, shock, gravitational attraction, repulsion, inertia, entropy, etc., including changes, interaction in the framework of irregular cases of modern physics as well. The book is an accessible avenue to understanding phenomena, ideas and mechanisms by leading authorities who offer much needed historical insights into the field and on the relationship Physics/Mathematics. It provides an absorbing and revealing read for historians, philosophers and scientists alike.

Highballer Greg Nolan, 2019-06-28

In 1983 at nineteen, Greg Nolan was hired reluctantly by his older sister's boyfriend, a treeplanting contractor based in Northern British Columbia. His crewmates didn't know what to think of the wide-eyed kid whose mom drove him the 750 kilometres to hook up with his first job. But within a week, Nolan was hitting the thousand trees a day mark. By the end of his first rookie season, he gained the status of top producer among a crew of extraordinary young men and women. Over the course of his twenty-seven year career, he planted over two and a half million trees. Planting large numbers of trees, Nolan excelled at surviving in some of the more remote, isolated and technically challenging regions in BC and Alberta that was trickier, often requiring resourcefulness and luck. Nolan was stalked by a large black bear on his first contract near Purden Lake, BC. He all but lost his mind supervising his first project deep in the wilds of Northern Alberta. He was nearly mauled by grizzlies while tenting out in the wilds of Bute Inlet. Nolan survived hurricanes, landslides, hostile loggers, Woodstock-like tent camps, whirlwind romances, the madness of the subculture and life-threatening situations of nearly every conceivable kind. Despite many escapes, Nolan was not immune to tragedy and he grappled with guilt over his own indirect role in a multiple fatality vehicle accident, throwing him into a deep depression. Only by returning to the challenge of planting trees in remote wilderness settings did he manage to find peace. For Nolan, the job offered far more than mere financial reward; it opened the door to a

world that very few people especially those in urban centres ever get the chance to experience As he writes Shit tends to happen with the craziest of frequency when you place yourself in the path of a tribe of roaming treeplanters The adventure never seems to play out the same way twice You come together in the middle of some of the most remote and pristine wilderness on the planet and once there you live work and experience things that will entertain your thoughts and haunt your memories for the rest of your days Hair raising cocky and a blast to read Highballer is an exuberant record of a time in the silviculture arena when the industry was largely unregulated and the wilderness was still wild The Gardeners' Chronicle,1922

Rosenblatt,2024-04-30 Across the United States groups of grassroots volunteers gather in overgrown systemically neglected cemeteries As they rake clean headstones and research silenced histories they offer care to individuals who were denied basic rights and forms of belonging in life and in death Cemetery Citizens is the first book length study of this emerging form of social justice work It focuses on how racial disparities shape the fates of the dead and asks what kinds of repair are still possible Drawing on interviews activist anthropology poems and drawings Adam Rosenblatt takes us to gravesite reclamation efforts in three prominent American cities Cemetery Citizens dives into the ethical quandaries and practical complexities of cemetery reclamation showing how volunteers build community across social boundaries craft new ideas about citizenship and ancestry and expose injustices that would otherwise be suppressed Ultimately Rosenblatt argues that an ethic of reclamation must honor the presence of the dead treating them as fellow cemetery citizens who share our histories landscapes and need for care
