Violence, Risk and Security Kate Fitz-Gibbon,Sandra Walklate,Jude McCulloch,JaneMaree Maher,2018-06-14 This edited collection addresses intimate partner violence risk and security as global issues Although intimate partner violence risk and security are intimately connected they are rarely considered in tandem in the context of global security Yet intimate partner violence causes widespread physical sexual and or psychological harm It is the most common type of violence against women internationally and is estimated to affect 30 per cent of women worldwide Intimate partner violence has received significant attention in recent years animating political debate policy and law reform as well as scholarly attention In bringing together a range of international experts this edited collection challenges status quo understandings of risk and questions how we can reposition the risk of IPV and particularly the risk of IPH as a critical site of global and national security It brings together contributions from a range of disciplines and international jurisdictions including from Australia and New Zealand United Kingdom Europe United States North America Brazil and South Africa The contributions here urge us to think about perpetrators in more nuanced and sophisticated ways with chapters pointing to the structural and social factors that facilitate and sustain violence against women and IPV Contributors point out that states not only exacerbate the structural

conditions producing the risks of violence but directly coerce and control women as both citizens and non citizens States too should be understood as collaborators and facilitators of intimate partner violence Effective action against intimate partner violence requires sustained responses at the global state and local levels to end gender inequality Critical to this end are environmental issues poverty and the divisions often along race and ethnic lines underpinning other dimensions of social and economic inequality

Mitchell,Relebohile Moletsane,2018-08-14 Much has been written in Canada and South Africa about sexual violence in the

context of colonial legacies particularly for Indigenous girls and young women While both countries have attempted to deal with the past through Truth and Reconciliation Commissions and Canada has embarked upon its National Inquiry on Missing and Murdered Indigenous Women and Girls there remains a great deal left to do Across the two countries history legislation and the lived experiences of young people and especially girls and young women point to a deeply rooted situation of marginalization Violence on girls and women s bodies also reflects violence on the land and especially issues of dispossession What approaches and methods would make it possible for girls and young women as knowers and actors especially those who are the most marginalized to influence social policy and social change in the context of sexual violence Taken as a whole the chapters in *Disrupting Shameful Legacies Girls and Young Women Speaking Back through the Arts to Address Sexual Violence* which come out of a transnational study on sexual violence suggest a new legacy one that is based on methodologies that seek to disrupt colonial legacies by privileging speaking up and speaking back through the arts and visual practice to challenge the situation of sexual violence At the same time the fact that so many of the authors of the various chapters are themselves Indigenous young people from either Canada or South Africa also suggests a new legacy of leadership for change

Being Spiritual while Doing Research Volker Kessler, Marilyn Naidoo, Tanya van Wyk, Philipp Wenk, Although the topic of spirituality has been experiencing a renaissance since the end of the previous century it is not always associated with academic activities The book invites scholars from all fields to rethink this traditional divide between knowledge and spirituality offering fresh perspectives on how the two can coexist and enhance each other Twenty nine authors from across the world illustrate how scholarly pursuits in various disciplines can be deeply spiritual journeys

Circular Economy for Buildings and Infrastructure Jian Zuo, Liyin Shen, Ruidong Chang, 2024-05-03 This edited volume covers theoretical and practical aspects of circular economy in building development offering chapters dealing with topics such as material design affordability of housing development waste management and recycling smart metering and more A particular focus is placed on various stakeholders points of view The book s chapters are co developed and contributed by multidisciplinary teams including both academics and industry practitioners The case study oriented approach taken here helps to facilitate the reader s understanding of how building sustainability can be achieved in the context of circular economy The building industry has significant environmental social and economic impacts As one of the biggest energy consumers and carbon emitters building sustainability has attracted wide attention globally Building projects and their associated activities consume a large amount of energy natural resources and water while producing a large proportion of wastes throughout their lifecycles The traditional linear approach of make use and dispose has been heavily criticized whilst the circular approach has gained momentum Indeed circular economy has emerged as one of key principles to manage sustainability related issues by means of focusing on the circularity of resources as well as the cost implications

Balancing Individualism and Collectivism Janet McIntyre-Mills, Norma Romm, Yvonne Corcoran-Nantes, 2017-10-03 This book

addresses the social and environmental justice challenge to live sustainably and well. It considers the consequences of our social, economic and environmental policy and governance decisions for this generation and the next. The book tests out ways to improve representation, accountability and regeneration. It addresses the need to take into account the ethical implications of policy and governance decisions in the short, medium and long term based on testing out the implications for self, other and the environment. This book recognizes the negative impact that humans have had on the Earth's ecosystem and recommends a less anthropocentric way of looking at policies and governance. The chapters discuss the geologic impact that people have had on the globe, both positive and negative, and brings awareness to the anthropocentric interventions that have influenced life on Earth during the Holocene era. Based on these observations, the authors discuss original ideas and critical reviews on ways to govern those who interpret the world in terms of human values and experience and to conduct an egalitarian lifestyle. These ideas address the growing rise in the size of the ecological footprints of some at the expense of the majority, the growth in unsustainable food choices and of displaced people, and the need for a new sense of relationship with nature and other animals among other issues. The chapters included in *Balancing Individualism and Collectivism: Social and Environmental Justice* encourage readers to challenge the sustainability agenda of the anthropocentric life. Proposed solutions to these unsustainable actions include structuralized interventions and volunteerism through encouragement and education with a focus on protecting current and future generations of life through new governmental etiquette and human cognizance.

Heidegger and Music Casey Rentmeester, Jeff R. Warren, 2022-02-02. Although philosophers have examined and commented on music for centuries, Martin Heidegger, one of the greatest philosophers of the 20th century, had frustratingly little to say about music directly. At least this volume, the first to tackle Heidegger and music, features contributions from philosophers, musicians, educators and musicologists from many countries throughout the world. It aims to utilize Heidegger's philosophy to shed light on the place of music in different contexts and fields of practice. Heidegger's thought is applied to a wide range of musical spheres including improvisation, classical music, electronic music, African music, ancient Chinese music, jazz, rock n roll, composition and musical performance. The volume also features a wide range of philosophical insights on the essence of music, music's place in society and the promise of music's ability to open up new ways of understanding the world with the onset of the technological and digital musical age. *Heidegger and Music* breaks new philosophical ground by showcasing creative vignettes that not only push Heidegger's concepts in new directions but also get us to question the meaning of music in various contexts.

Sustainable Development in Africa Walter Leal Filho, Rudi Pretorius, Luiza Olim de Sousa, 2021-07-09. This book serves the purpose of documenting and promoting African experiences on sustainable development which encompasses both formal and non-formal education. Sustainable development is very important to Africa but there is a paucity of publication which documents and promotes experiences from African countries. Due to their complexity, the interrelations between social, economic and political factors related to sustainable development especially at

universities need to be better understood There is also a real need to showcase successful examples of how African institutions are handling their sustainability challenges It is against this background that this book has been produced It is a truly interdisciplinary publication useful to scholars social movements practitioners and members of governmental agencies and private companies undertaking research and or executing projects focusing on sustainability from across Africa As African nations strive to pursue the UN Sustainable Development Goals it is imperative to cater for the information needs seen across the continent and foster the dissemination of experiences and case studies which may support both on going and future efforts The scope of the book is deliberately kept wide and we are looking for contributions across the spectrum of sustainable development from business and economics to arts and fashion administration environment languages and media studies
