ECKM2014-Proceedings of the 15th European conference on Knowledge Management Carla Vivas,2014-10-01 The world economy in which we are living poses challenges that lead to a realization that more of the same will be difficult to sustain This provides an illustration that in order to create new or modified knowledge practices strengthen customer relationships and thus positively influence customer satisfaction organizations must be flexible in configuring combining knowledge and knowledge structures in a way that is appropriate for delivering value to the customer It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services Thus unlearning forgetting becomes a critical means for organizational success The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community s in depth understanding of learning and unlearning to better understand knowledge management Our aim is to stimulate breakthrough research streams linking learning unlearning and knowledge management How can organizations tailor use and extend techniques and tools from knowledge management for improving their business practices and processes Building upon existing work on knowledge management KM and organizational learning the conference will promote interdisciplinary approaches from computer science and information systems business management and organization science as well as cognitive science Emphasis will be put on systematic learning from experience KM tools and KM success factors A special interest belongs to knowledge management initiatives which are lightweight i e do not place considerable additional burden on users and KM experts allow an incremental adoption i e do not require large up front investment before any return of investment is at least visible and are flexible regarding frequent changes in experts and topics Continuing the success of the ECKM conference series since 2000 the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge intensive organizations

Schooling in

Sub-Saharan Africa Clive Harber, 2017-07-12 This book is a comprehensive text for those interested in formal education in sub-Saharan Africa. It provides a thought-provoking overview of the key educational ideas, themes and issues facing schooling in Africa today by drawing on a wide literature to examine evidence concerning both educational policy and the working realities of primary and secondary schools in Africa. Based on the author's forty years of experience in researching and publishing on education in Africa, it takes a balanced but critical approach to analysing education in Africa and discusses both positive and negative patterns across the region as well as identifying differences between and within countries. The book examines major questions of educational provision, structure, content and process but does so in a way that raises challenging questions about gender inequality, violence, authoritarianism and democracy in education as well as the fundamental question of whether education is achieving its desired outcomes. It will be of great interest to students and researchers working in the fields of comparative and international education, education and international development, African education, African studies and development studies.

Teaching as a Human Experience Patrick Blessinger, Karen J. Head, 2015-09-18 The poems in this collection deal with the real-life worlds of professors, instructors, lecturers, teachers and others working in education. This volume covers contemporary teaching experiences in education, including the many roles that teachers play, such as instructing, lecturing, mentoring, facilitating, coaching, guiding and leading. This volume covers the manifold life experiences and perspectives of being and working as a teacher in education and the epiphanies experienced in that role. This volume gives creative voice to the full range of experiences by teachers, students and others and empowers readers with inspiration and personal agency as they evolve as self-creating, self-determining authors of their own lives, both personally and professionally. The poems in this volume are largely based on teachers' meaningful experiences in and out of the classroom and will provide artistic inspiration and creative insight to others who currently work as teachers or those students who are preparing to be professors, instructors and teachers or those students who simply enjoy the creative voice of others.

Annual Report South Africa. Film and Publication Board, 2016 *Mathematics Education in Africa* Brantina Chirinda, Kakoma Luneta, Alphonse Uworwabayeho, 2022-11-28 This book is about mathematics teaching and learning in Africa during the Fourth Industrial Revolution. The Fourth Industrial Revolution (4IR) has evolved to utilize new technologies in the teaching and learning of Mathematics. It is characterized by the fusion of the biological, physical and digital worlds and embodies a new era of innovation in mathematics education, leading to the rapid emergence of new technologies for mathematics teaching and learning. Because 4IR in mathematics education is happening differently in various parts of Africa, the authors of the various chapters in this volume have positioned their work in their respective local contexts. The chapters address a wide variety of interests, concerns and implications regarding 4IR and Mathematics Education in Africa. Additionally, a number of chapters address teaching mathematics in the context of the COVID-19 pandemic that has gripped the world. Other chapters discuss the implications of inequalities in Africa that affect mathematics education during 4IR.

Chapters also incorporate arguments observations and suggestions to improve and transform the teaching and learning of mathematics in Africa during the 4IR This book highlights a new era of innovation in mathematics education in the context of the Fourth Industrial Revolution leading to the rapid emergence of new technologies in mathematics teaching and learning It is a valuable resource for graduate students people with research interests in the fourth industrial revolution and mathematics educators at any level including all mathematics teachers mathematics education curriculum designers and policymakers [Flexible Work Organizations](#) Sushil,Julia Connell,John Burgess,2016-06-18 This book focuses on the

Effects of Globalization on Education Systems and Development Macleans A. Geo-JaJa,Suzanne Majhanovich,2016-11-04 With its comprehensive coverage and quality this provocative book is concerned with the future of developing countries in Africa Asia and Latin America By providing in depth analysis of the economic social and educational challenges of emerging states it offers an alternative roadmap to development The authors in this collection substantiate the notion that emerging states often do not participate in policy choices related to their development when faced with universalization of curriculum and internationalization of education The authors make explicit the direct and indirect effects

of globalization on educational systems social equity and the path of development In demonstrating the impact of neoliberalism or market based reforms on the developing world the authors show that education without human rights is vulnerable to negative forces of globalization and internationalization The message of the book is quite pessimistic about possibilities to widen the economic space or increase freedom unless development cooperation is made possible by Helping People Help Themselves as suggested by David Ellerman The authors note that in the past the issue of emerging states as an appendage to the world economy was a fundamental question related to colonialism but now has become a question of imperialism which needs to be examined when considering the current patterns of development *Enemy of the People* Adriaan Basson, Pieter du Toit, 2017-11-07 *Enemy of the People* is the first definitive account of Zuma's catastrophic misrule offering eyewitness descriptions and cogent analysis of how South Africa was brought to its knees and how a people fought back When Jacob Zuma took over the leadership of the ANC one muggy Polokwane evening in December 2007 he inherited a country where GDP was growing by more than 6% per annum a party enjoying the support of two thirds of the electorate and a unified tripartite alliance Today South Africa is caught in the grip of a patronage network the economy is floundering and the ANC is staring down the barrel of a defeat at the 2019 general elections How did we get here Zuma first brought to heel his party Africa's oldest and most revered liberation movement subduing and isolating dissidents associated with his predecessor Thabo Mbeki Then saw the emergence of the tenderpreneur and those attempting to capture the state as well as a network of family friends and business associates that has become so deeply embedded that it has in effect replaced many parts of government Zuma opened up the state to industrial scale levels of corruption causing irreparable damage to state enterprises institutions of democracy and the ANC itself But it hasn't all gone Zuma's way Former allies have peeled away A new era of activism has arisen and outspoken civil servants have stepped forward to join a cross section of civil society and a robust media As a divided ANC square off for the elective conference in December where there is everything to gain or to lose award winning journalists Adriaan Basson and Pieter du Toit offer a brilliant and up to date account of the Zuma era
