Unit 2 Economics June 2013 Mark Scheme:

The End of Stationarity Mark Schapiro, 2016-05-17 Scientists have devised a new term to explain the turmoil caused by climate change the end of stationarity It means that our baselines for rainfall water flow temperature and extreme weather are no longer relevant that making predictions based on past experience is no longer possible But climate change has upended baselines in the financial world too disrupting the global economy in ways that are just becoming clear leaving us unable to assess risk and causing us to fundamentally re think economic priorities and existing business models At the heart of that financial unrest is the role of carbon and as the world moves toward making more and more polluters pay to emit it a financial mystery unfolds What are the costs Who has the responsibility to pay for them Who do you pay How do you pay And how will those costs ripple through the economy These are the questions veteran journalist Mark Schapiro attempts to answer as he illuminates the struggle to pinpoint carbon's true costs and allocate them fairly all while bumping up against the vagaries of the free market the lobbying power of corporations the political maneuverings of countries and the tolerance of everyday consumers buying a cup of coffee a tank of gas or an airplane ticket Along the way Schapiro tracks the cost of carbon through the drought ridden farmland of California the jungles of Brazil the world's greatest manufacturing center in China the carbon trading center of Europe and the high tech crime world that carbon markets have inspired He even tracks the cost of carbon through the skies themselves where efforts to put a price tag on the carbon left by airplanes in the no man's land of the atmosphere created what amounted to a quiet but powerful global trade war *The End of Stationarity* deftly depicts the wild new carbon economy and shows us how nations emerging and developed teeter on its brink Originally published in hardcover as *Carbon Shock* the book is updated throughout and includes a new afterword based on the Paris climate talks

The Ethics of Public Health Paternalism T M Wilkinson, 2024-12-30 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations *The Ethics of Public Health Paternalism* is about policies that try to stop people damaging their own health From the point of view of public health advocates if people did not smoke or drank less alcohol or kept off junk food and sugary liquids they would tend to be healthier Hence such tactics as taxing tobacco restricting the sale of alcohol and limiting the density of fast food outlets Because these tactics appear to limit freedom of choice they are often pejoratively described as the actions of a nanny state that overvalues health and wrongly infringes on the autonomy of adults But many of us want to be healthy rather than ill and alive rather than dead Does a state really nanny us when it uses its power to make us healthier If it does should it stop Some public health policies might reduce inequities of health or save costs in medical treatment or correct market failures But as this book shows lots would not The best case for many public health interventions is paternalistic aiming to steer people away from making unhealthy choices against their own interests But even though it is the best case it often fails It overvalues health and undervalues autonomy It

exaggerates the influence of addiction and the marketing of unhealthy products Except for smoking we do not have the evidence needed to show that unhealthy choices are so mistaken as to justify the interventions Much of what modern public health does when it tries to stop adults damaging their health has not been justified The Ethics of Public Health Paternalism applies political and moral philosophy to the ideas of both supporters and critics of public health interventions It uses philosophical analysis of the values of health and well being to explain what sort of evidence is needed to support public health interventions thus exposing a major gap in the arguments of public health advocates and it engages in detail with empirical evidence for instance about smokers regrets

Land Grabbing in Africa Fassil Demissie, 2017-10-02 The sign that Africa is on Sale has been appearing with regular frequency in major newspaper accounts across the world indicating that large amounts of Africa's rich farmlands are being sold to transnational investors usually on long term leases at a rate not seen in decades indeed not since the colonial period Transnational and national economic actors from various business sectors oil and auto mining and forestry food and chemical bioenergy etc are eagerly acquiring or declaring their intention to acquire large areas of land on which to build maintain or extend large scale extractive and agro industrial enterprises to help secure their own food and energy needs into the future This book provides a critical appraisal of the growing phenomenon of land grabbing in Africa Far from being a technical issue associated with good governance the problem of land grabbing by transnational corporation and states is a serious threat for the food security of millions of Africans and is undoubtedly one of the great challenges of our time for development on the continent The case studies illustrate that African states are also complicit in the massive land grabbing by actively participating in isolated development while excluding the local communities The case studies reveal key features that characterize how the global land grab plays out in specific localities in Africa This book was published as a special issue of *African Identities*

BWB Texts: Economic Futures Paul Dalziel, Caroline Saunders, Shamubeel Eaqub, Max Rashbrooke, 2014-12-12 Get up to speed with some of the biggest challenges facing New Zealand with this bundle of high profile BWB Texts These four works are combined into one easy to read e book available direct and DRM free from our website or from international e book retailers Seventy five years after Labour's social security reforms of the 1930s Paul Dalziel and Caroline Saunders argue in *Wellbeing Economics* it is time for a major shift in New Zealand's economic perspective In *Growing Apart* Shamubeel Eaqub highlights the changing economic fortunes of people in different parts of New Zealand the growing gaps between our regions Max Rashbrooke's *The Inequality Debate* provides a succinct introduction to income inequality in New Zealand using the latest data The meaning of The Piketty Phenomenon for New Zealand is explored by a diverse range of economists and commentators addressing the relevance of Thomas Piketty's *Capital* in the Twenty First Century BWB Texts are short books on big subjects by great New Zealand writers Commissioned as short digital first works BWB Texts unlock diverse stories insights and analysis from the best of our past present and future New Zealand writing

The Moral Economy of Welfare and Migration Lydia

Morris,2021-08-15 Britain's coalition government of 2010-2015 ushered in an enduring age of austerity and a moral mission of welfare reform as part of a drive for deficit reduction. Stricter controls were applied to both domestic welfare and international migration and asylum which were presented as two sides of the same coin. Policy in both areas has engaged a moral message of earned entitlement and invites a sociological approach that examines such policies in combination alongside their underpinning moral economy. Exploring the idea of a moral economy from its original focus on popular rebellion at the rising price of corn to more contemporary analysis of measures that seek to impose moral values from above, Lydia Morris examines Britain's reconfigured pattern of rights in the fields of domestic welfare and migration. Those in power have claimed that heightened conditions and sanctions for the benefit-dependent domestic population, both in and out of work, will promote labour market change and reduce demand for low-skilled migrant workers. Often EU citizens whose own access to benefits was curtailed prior to Brexit, Morris traces related political discourse through to the design and implementation of concrete policy measures and maps the diminished access to rights that has emerged, paying particular attention to the boundaries drawn in defining target groups and the resistance this has provoked. *The Moral Economy of Welfare and Migration* considers the topology of the whole system to highlight cross-cutting devices of control that have far-reaching implications for how we are governed as a total population. — *The Global Coal Market* Mark C. Thurber, Richard K.

Morse,2015-07-20 Coal has been the world's fastest growing energy source in absolute terms for over a decade. Coal also emits more CO₂ than any other fossil fuel and contributes to serious air pollution problems in many regions of the world. If we hope to satisfy the demand for affordable energy in emerging economies while protecting the environment, we need to develop a keen understanding of the market that supplies coal. This book offers an in-depth analysis of the key producers and consumers that will most influence coal production, transport and use in the future. By exploring how countries such as China, India, Indonesia, Australia and South Africa have developed their respective coal industries and how these industries link together through the international coal trade, experts shed light on how the global coal market may evolve and the economic and environmental implications. This book is the most comprehensive treatment of these topics to date and will appeal to a wide readership including scholars and practitioners working on energy, economics and policy. — **Regenesi** George

Monbiot,2022-08-02 Winner of the 2022 Orwell Prize for Journalism. A Sunday Times London Bestseller. Shortlisted for the Wainwright Prize for Writing on Conservation. George Monbiot is one of the most fearless and important voices in the global climate movement today. Greta Thunberg: For the first time in millennia we have the opportunity to transform not only our food system but our entire relationship to the living world. Farming is the world's greatest cause of environmental destruction and the one we are least prepared to talk about. We criticize urban sprawl but farming sprawls across thirty times as much land. We have plowed, fenced and grazed great tracts of the planet, felling forests, killing wildlife and poisoning rivers and oceans to feed ourselves. Yet millions still go hungry and the price of food is rising faster than ever. Now the food system itself

is beginning to falter But as George Monbiot shows us in this brilliant bracingly original new book we can resolve the biggest of our dilemmas and feed the world without devouring the planet *Regenesi*s is a breathtaking vision of a new future for food and for humanity Drawing on astonishing advances in soil ecology Monbiot reveals how our changing understanding of the world beneath our feet could allow us to grow more food with less farming He meets the people who are unlocking these methods from the fruit and vegetable grower revolutionizing our understanding of fertility through breeders of perennial grains liberating the land from plows and poisons to the scientists pioneering new ways to grow protein and fat Together they show how the tiniest life forms could help us make peace with the planet restore its living systems and replace the age of extinction with an age of regenesi

s Globalization Development and Social Justice Ann El Khoury,2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies *Globalization Development and Social Justice* advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies

Second Thoughts Armand de Mestral,2017-01-30 Criticism Doubts Second thoughts Although investor state arbitration ISA has been included in investment agreements between developed and developing countries since the 1960s and provided foreign investors with a kind of private justice against developing world host states it became increasingly controversial in developed countries when it was included in NAFTA in 1993 creating the possibility of ISA claims between and against two developed countries the United States or Canada as well as claims against and by a developing state Mexico A few years later the OECD s attempt to finalize the Multilateral Agreement on Investment was stymied by concerted civil society protest and opposition to ISA and in recent years each new proposed agreement has sparked fresh rounds of protest What engenders the controversy about ISA While ISA s advantage is that it prevents escalation of international conflict by relieving states from feeling obliged to espouse claims of injured investors against foreign governments it is criticized for creating regulatory chill whereby states are reluctant to make necessary public policy reforms for fear that changes to the

investment environment will lead to expensive investor claims Are fears of litigation and expensive payouts well founded Can key modifications to the ISA system such as those added to the Comprehensive Economic and Trade Agreement satisfy critics and redeem this system of private justice Is ISA really necessary between developed democracies where an independent and professional judiciary can generally be trusted to decide without fear or favour In *Second Thoughts Investor State Arbitration between Developed Democracies* 16 international investment legal experts have undertaken in depth analyses of ISA s economic political and social impacts when included in agreements between developed democracies This timely volume appears at a critical moment seeking answers to the crucial questions that will determine the next generation of international investment agreements

Life-Cycle Greenhouse Gas Emissions of Commercial Buildings Cuong N. N. Tran,Vivian W. Y. Tam,Khoa N. Le,2021-07-12 This book develops a model to evaluate and assess life cycle greenhouse gas emissions based on typical Australian commercial building design options It also draws comparisons between some of the many green building rating tools that have been developed worldwide to support sustainable development These include Leadership in Energy and Environmental Design LEED by the United States Green Building Council USGBC Building Research Establishment Environmental Assessment Method BREEAM by the Building Research Establishment Comprehensive Assessment System for Building Environmental Efficiency CASBEE by the Japanese Sustainable Building Consortium and Green Star Environmental Rating System by the Green Building Council of Australia Life cycle assessment LCA life cycle energy consumption and life cycle greenhouse gas emissions form the three pillars of life cycle studies which have been used to evaluate environmental impacts of building construction Assessment of the life cycle greenhouse gas emissions of buildings is one of the significant obstacles in evaluating green building performance This book explains the methodology for achieving points for the categories associated with reduction of greenhouse gas emissions in the Australian Green Star rating system The model for the assessment uses GaBi 8 7 platform along with Visual Basic in Microsoft Excel and shows the relationship between the building s energy consumption and greenhouse gas emissions released during the lifetime of the building The data gathered in the book also illustrates that the green building design and specifications are becoming more popular and are being increasingly utilized in Australia This book is important reading for anyone interested in sustainable construction green design and buildings and LCA tools
