I. Business plan

- ▣ A plan for the development of a business, giving details such as the products to be made, resources needed & forecasts such as costs, revenues & cash flow.
- ▣ Initially, new businesses will create a plan to follow but changes in external factors will lead to changes in business plans.
- ▣ Business plan is a written document by the business regarding its operations.

Business plan is:

- Mainly created by the owner
- For future use

II. Relevance of a Business Plan

- ▣ A business plan is needed to support applications for finance, both at the start-up stage & in the future. Lenders & other investors are not likely to put money into a business unless the owners can provide a clear, concise vision of future progress & profitability.
- ▣ In particular, investors will want to know how their money is going to be spent & when & how they are going to benefit from their investment.

III. Uses of a business plan

1. To show a clear direction for the development of a business.

- When the business creates a business plan, they can see the potential problem in advance & find solution.
e.g., If the business decided to expand in the future, then they will have to increase their production. The problem is the source of finance. As a result, they can think of in advance where they will get the finance.

IV. Contents of a Business Plan

1. An executive summary-usually business plan is very lengthy. So, there should be a summary of the whole business plan included on the business plan itself.

5. Personnel-who will run the business, how many employees.
