Todd,Gerd Gigerenzer,2012-04-10 More information is always better and full information is best More computation is always better and optimization is best More is better ideals such as these have long shaped our vision of rationality Yet humans and other animals typically rely on simple heuristics to solve adaptive problems focusing on one or a few important cues and ignoring the rest and shortcutting computation rather than striving for as much as possible In this book we argue that in an uncertain world more information and computation are not always better and we ask when and why less can be more The answers to these questions constitute the idea of ecological rationality how we are able to achieve intelligence in the world by using simple heuristics matched to the environments we face exploiting the structures inherent in our physical biological social and cultural surroundings **Carbon Pricing, Growth and the Environment** Lawrence A. Kreiser,Ana Yábar Sterling,Pedro Manuel Herrera Molina,Janet E. Milne,Hope Ashiabor,2012-01-01 The scope depth and persistence with which this book explores carbon pricing is admirable reflecting that despite political reluctance it is a topic in all parts of the world _ Mikael Skou Andersen Aarhus University Denmark and European Environment Agency Environmental taxation and emissions trading continue to be high on the public policy agenda in many countries and this is another welcome and very interesting volume in the Critical Issues in Environmental Taxation series that presents new ideas and evidence on these subjects from a

wide range of countries and a variety of perspectives _ Paul Ekins University College London UK This original and timely volume provides unique insights and analysis on the pressing question of how to achieve environmental sustainability while fostering economic growth The emphasis of the book lies in finding critical solutions to global climate change including chapters on environmental fiscal reform and unemployment in Spain EU structural and cohesion policy and sustainable development ecological tax reform in Europe and Asia Australia s carbon pricing mechanism and many other timely topics This insightful volume will appeal to policy makers in government as well as academics and students in environmental law environmental economics and environmental sustainability

Church, Capitalism, and Democracy in Post-Ecological Societies Cheng-tian Kuo,2018-10-24 Most ecotheologies build their arguments on the Bible s creation story and resurrection narrative in the hope to save the ecology through spiritual meditation reforming capitalism and or deliberative democracy However based on a Chinese Christian social scientist s perspective this book argues that few of these ecotheologies are theologically and empirically valid Instead it proposes a neuro institutional post ecology theology that builds on the major themes of the Last Judgment to refocus ecotheology toward evangelism and to adapt ecotheology to capitalism and democracy in order to embrace the already but not yet impacts of the inevitable total destruction of the ecology in the near future The vanities in current ecotheologies are divided into religious economic and political categories Among the major ones discussed in this book are the vanities of ecological meditation theology leftist and rightist economic theologies as well as ecotheologies of green authoritarianism and deliberative democracy Even if these ecotheologies work perfectly as they were intended to global ecological crises have passed the point of no return i e post ecology and rendering all of them a global vanity Based on a Chinese Christian social scientist s perspective this book proposes a moderate course of ecological spirituality economic behaviors and democratic actions but with a radical devotion to crisis management and evangelism in preparation for the Doomsdays This book is unique in its balanced interdisciplinary composition employing theories from cognitive science Christian theology economics
