War by Other Means Robert D. Blackwill, Jennifer M. Harris, 2016-04-11 A Foreign Affairs Best Book of 2016 Today nations increasingly carry out geopolitical combat through economic means Policies governing everything from trade and investment to energy and exchange rates are wielded as tools to win diplomatic allies punish adversaries and coerce those in between Not so in the United States however America still too often reaches for the gun over the purse to advance its interests abroad The result is a playing field sharply tilting against the United States Geoeconomics the use of economic instruments to advance foreign policy goals has long been a staple of great power politics In this impressive policy manifesto Blackwill and Harris argue that in recent decades the United States has tended to neglect this form of statecraft while China Russia and other illiberal states have increasingly employed it to Washington's disadvantage G John Ikenberry Foreign Affairs A readable and lucid primer The book defines the extensive topic and opens readers eyes to its prevalence throughout history Presidential candidates who care more about protecting American interests would be wise to heed the advice of War by Other Means and take our geoeconomic toolkit more seriously Jordan Schneider Weekly Standard **Christian**

Theological Education and the Response to the Crisis in Zimbabwe Bekithemba Dube, Gift Masengwe, 2025-10-02 The book offers an incisive examination of the governing philosophy of the Zimbabwe African National Union Patriotic Front ZANU PF referred to as Zanupfism characterizing it as marked by callousness and malevolence towards dissenting voices from civil society and opposition factions This pernicious application of power extends beyond mere verbal aggression to

encompass militaristic actions engendering a profound generational crisis within Zimbabwe. The contributors explore the compelling juxtaposition between President Emmerson Mnangagwa and the biblical Nebuchadnezzar II, a ruler notorious for his autocratic reign and expansive ambitions. Further, critically scrutinizing the complicity of neo-Pentecostal prophets in the book reveals how these religious figures promote an esoteric understanding of the divine, diverging from a theology rooted in justice, thereby enabling the oppressive regime's practices. This critique underscores the imperative for prophets to recalibrate their theological perspectives, urging them to move beyond magical interpretations of faith toward an authentic engagement with a personal God who champions justice. The book further encompasses the complex interplay of political and religious narratives, examining how church leaders either bolster or undermine Mnangagwa's political ideology, highlighting the tendency among certain religious factions to deify political authority, ultimately exacerbating societal inequities. In advocating for a transformative theological discourse in Zimbabwe, the book asserts that religious narratives must serve as instruments for fostering democracy, social justice, and equity, rather than sustaining a status quo that entrenches authoritarian governance. The necessity for unified, principled resistance, grounded in the collective agency of the populace, emerges as a salient theme in the quest for meaningful political and social reform.

Intellectual, Scientific, and Educational Influences on Sustainability Research Turvey, Rosario Adapon, Kurissery, Sreekumari, 2019-06-28. Over the last few decades, the new discipline of sustainability science (SS) has evolved with a phenomenal rise in knowledge production, research, and publications, as well as the development of new academic programs and creation of centers and scientific communities, networks, and organizations. With pressing global environmental issues in the 21st century, SS has become an influential discipline and important subject of intellectual inquiry that deserves support from the academy and scientific communities worldwide to find solutions to global problems such as climate change, environmental degradation, and biodiversity loss. *Intellectual, Scientific, and Educational Influences on Sustainability Research* is a concise and authoritative book that fills the crucial and unmet need for educational materials that integrate theoretical foundations, methodological basis, and practice in the science of sustainability. The goal of the book is to increase accessibility and use of educational and scientific knowledge among academic and non-academic audiences, as it assembles the wisdom and insights from up-to-date scholarship and advances in this new discipline. Highlighting various topics such as biodiversity, public transportation, and human development, it is ideal for environmentalists, ecologists, technology developers, policymakers, academicians, researchers, and students.

Innovation, Regional Integration, and Development in Africa Samuel Ojo Oloruntoba, Mammo Muchie, 2018-07-26 This edited volume discusses the role of innovation and regional integration in economic development in Africa Over the past five decades post colonial African countries have struggled to break loose from the trap of poverty and underdevelopment through the adoption of various development strategies at regional national and continental levels However the results of both national and regional efforts at advancing development on the continent have been mixed Although the importance of agglomeration and fusion of institutions have long been recognized as possible path to achieving economic development in Africa the approach to regionalism has been unduly focused on market integration while neglecting other dimensions such as social policy mobility of labor educational policy biotechnology regional legislation manufacturing innovation and science and technology This volume investigates the link between innovation regional integration and development in Africa arguing that the immediate and long term development of Africa lies not just in the structural transformation of its economies but in the advancement of scientific and innovation capacities The book is divided into four parts Part I addresses the theoretical and conceptual underpinnings of innovation and regional integration in Africa Part II presents case studies which examine how regional economic institutions are fostering innovation in Africa Part III of the book deals with sectoral issues on innovation and integrated development in Africa Part IV sets the future research on innovation regional integration and development in Africa Combining theoretical analysis and a comparative interdisciplinary approach this volume is appropriate for researchers and students interested in economic development political economy African studies international relations agricultural science and geography as well as policymakers in regional economic communities and the African Union

Developments in the use of hermetic bags for grain storage Dr Dieudonne Baributsa,Dr Ma Cristine Concepcion Ignacio,2020-07-05 Smallholder farmers' interest in hermetic bags has been driven by the need to reduce grain storage losses due to insect pests and challenges inefficacy of current storage methods Hermetic bags commercially available for grain storage include single double and triple layer plastic bags For the last 12 years more than 20 million hermetic bags have been sold to smallholder farmers and other users in Africa primarily and Asia The rapid increase in the use of hermetic bags is due to the scalability of both awareness activities including training to create demand and the supply chain efforts to improve availability through the private sector Many of these hermetic bags have several benefits including i preserving grain without the use of insecticides ii keeping grain in good quality from several months to at least two years iii providing farmers the flexibility to sell when prices are high and iv allowing farmers to store grain and seed using the same technology Challenges to increase adoption of hermetic bags include limited awareness and availability of the technologies in rural areas variability in the quality of the hermetic bags and lack of standards to ensure effectiveness across different products
