Scientific Computing Michel Grave, Yvon Le Lous, W. Terry Hewitt, 2012-12-06 Visualization in scientific computing is getting more and more attention from many people Especially in relation with the fast increase of computing power graphic tools are required in many cases for interpreting and presenting the results of various simulations or for analyzing physical phenomena The Eurographics Working Group on Visualization in Scientific Computing has therefore organized a first workshop at Electricite de France Clamart in cooperation with ONERA Chatillon A wide range of papers were selected in order to cover most of the topics of interest for the members of the group for this first edition and 26 of them were presented in two days Subsequently 18 papers were selected for this volume 18 presentations were organized in eight small sessions in addition to discussions in small subgroups The first two sessions were dedicated to the specific needs for visualization in computational sciences the need for graphics support in large computing centres and high performance networks needs of research and education in universities and academic centres and the need for effective and efficient ways of integrating numerical computations or experimental data and graphics Three of those papers are in Part I of this book The third session discussed the importance and difficulties of using standards in visualization software and was related to the fourth session where some reference models and distributed graphics systems were discussed Part II has five papers from these sessions

New Technologies for Supercolliders L. Cifarelli, Thomas Ypsilantis, 2012-12-06 The present volume is based on the proceedings of the 12th Workshop of the INFN ELOISATRON Project held at the Ettore Majorana Centre for Scientific Culture EMCSC Erice fra pani Sicily Italy in the period September 15 20 1990 The proceedings deal with the presentation of New Technologies for Supercolliders Three new energy frontiers 16 40 and 200 TeV are now opened up for the future of Subnuclear Physics Basic problems above the Fermi energy are crowding up but no one knows the energy levels needed for their solution This is why the technology for experiments with the new generation of Supercolliders needs to be pursued having in mind the problems which are of common interest in the three energy frontiers The primary purpose of the

Workshop was to contribute towards the highest energy limit in the search for new instruments and new technologies Furthermore the present status and performances of various detector technologies were reviewed The possible options for a powerful apparatus whose goal would be the discovery of the top Higgs and SUSY particles in a very high energy high rate environment were finally analysed The Workshop was sponsored by the Italian National Institute for Nuclear Physics INFN the Italian Ministry of Education the Italian Ministry of Scientific and Technological Research and the Sicilian Regional Government We are thankful to the staff of EMCSC for their efficient and warm support
