NASA Space Technology Roadmaps and Priorities National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Steering Committee for NASA Technology Roadmaps, 2012-06-07. NASA's Office of the Chief Technologist (OCT) has begun to rebuild the advanced space technology program in the agency with plans laid out in 14 draft technology roadmaps. It has been years since NASA has had a vigorous, broad-based program in advanced space technology development and its technology base has been largely depleted. However, success in executing future NASA space missions will depend on advanced technology developments that should already be underway. Reaching out to involve the external technical community, the National Research Council (NRC) considered the 14 draft technology roadmaps prepared

by OCT and ranked the top technical challenges and highest priority technologies that NASA should emphasize in the next 5 years This report provides specific guidance and recommendations on how the effectiveness of the technology development program managed by OCT can be enhanced in the face of scarce resources

Mission Geometry; Orbit and Constellation Design and Management James R. Wertz, 2002-01-31 Mission Geometry Orbit and Constellation Design and Management OCDM is the most complete treatment available for many elements of space mission design and astronautics OCDM discusses both the similarities and differences between orbit and attitude systems in terms of hardware algorithms design and processing requirements With the demand for reduced cost and the introduction of extensive on board computing what were once entirely separate disciplines have begun to merge This volume will speed that process In all areas OCDM is meant to be practical with recommendations insights formulas and numerical recipes based on 40 years of spaceflight experience from organizations worldwide It is meant to be both a text and reference work that can be used by those entering the field and by senior engineers engaged in the design analysis construction or on orbit operations of orbit and attitude systems and components
