Lady Astronauts, Lady Engineers, and Naked Ladies Karin Hilck, 2019-07-08 The book Lady Astronauts Lady Engineers and Naked Ladies is a gender history of the American space community and by extension a social history of American society in the twentieth century during the Cold War In order to expand and differentiate the prevalent postwar narrative about gender relations and cultural structures in the United States the book analyzes several different groups of women interacting in different social spaces within the space community It therewith grants insight into the several layers of female participation and agency in the community and the gender and race based obstacles and hurdles the female prospective astronauts scientists engineers artists administrators writers hostesses secretaries and wives were faced with at NASA and in the space industry In each chapter a different social space within the space community is analyzed The spaces where the women lived and worked are researched from a media individual and institutional angle ultimately revealing the differing gender philosophies communicated in the public sphere and the space community workplaces by government and space community officials While women were publicly encouraged to participate in the American space effort to beat the Soviet Union in the race to the moon women had to deal with gender based barriers which were integral to the structures of the space community just as they were an intrinsic component of all societal structures in the United States in the 1960s The female space workers who were often perceived as disrupters of the prevalent social order in the space community and discriminated by some of their male colleagues and bosses on a personal basis still managed to assert themselves They molded pockets of agency in the space community workspaces without the facilitation of regulations on the part of NASA that might have provided them with easier access or more agency Thus the

space community a place of technological innovation was not necessarily also a place of social innovation but a community with a government agency at its center that mainly mirrored the current changing social order conventions and policies in the 1960s as well as in the 1970s and 1980s Nevertheless the women presented in this book were instrumental in advancing and consolidating the social transformation that happened within the space community and the United States and therefore make intriguing subjects of research Thus this systematic analysis of the connection between gender space and the Cold War adds a new dimension to space history as well as expands the discourse in American history about gender relations and the opportunities of women in the twentieth century *The People's Spaceship* Amy Paige Kaminski, 2025-07-15 When the Apollo 11 astronauts returned from humanity's first voyage to the moon in 1969 NASA officials advocated for more ambitious missions But with the civil rights movement environmental concerns the Vietnam War and other social crises taking up much of the public's attention they lacked the support to make those ambitions a reality Instead the space agency had to think more modestly and pragmatically crafting a program that could leverage the excitement of Apollo while promising relevance for average Americans The resulting initiative the space shuttle would become the centerpiece of NASA human space flight activity for forty years opening opportunities for the public to engage with and participate in space projects in new ways The People's Spaceship traces how and why NASA painstakingly connected the vehicle to so many segments of society Underscoring the successes and challenges endured in the process Amy Paige Kaminski shares the story of how the space shuttle became an American technological icon **Space Patrol** Jean-Noel Bassior, 2015-05-07 Before Star Trek there was Space Patrol Science fiction television has its roots in this live action packed series that captured the imagination of Americans from 1950 to 1955 when space travel was just a dream This book explores the freewheeling spirit of live TV where anything could go wrong before millions of viewers and often did It spotlights often in personal interviews the risk taking Space Patrol cast and crew who laid vital groundwork for television today Included are episode logs for both television and radio shows as well as a complete guide to Space Patrol memorabilia The funding of science and discovery centres Great Britain: Parliament: House of Commons: Science and Technology Committee, 2007-10-22 Examines the role and effectiveness of science centres how science centres are coordinated and organised and how they are funded This report also welcomes the offer by the Department for Innovation Universities and Skills to take responsibility for science centres Management, a Bibliography for NASA Managers, 1992 The Space Legislation of the United Kingdom Alexander Simmonds, 2025-08-04 In the only comprehensive study of its kind this book explores the space legislation of the United Kingdom charting the history of the early United Kingdom space program through to the Space Industry Act 2018 and subsequent Regulations In addition to an analysis of the licensing regime and its normative underpinnings this work also presents a comparative overview of the United Kingdom's domestic space legislation in addition to aspects of telecommunications law There is also particular focus on the novel provisions of the legislation pertaining to human occupants and the intersection with other

relevant instruments and common law principles *Space Strategy and Military Doctrine* Bert Chapman, 2025-07-24
Examining open access civilian and military space policy strategy and doctrine documents this book highlights emerging trends and developments in military space strategy Bert Chapman collects public documents from Australia Canada the European Union NATO the United States and the United Kingdom from 2017 onward to illustrate space's critical importance to national and international security and to multiple areas of civilian economic and personal use including climate change food security personal and global communications and the potential for expanded space exploration In light of recent revelations that Russia may be capable and desirous of exploding nuclear weapons in space to damage civilian and military space based infrastructures of the U S and other countries and China's increasing space assertiveness and capabilities it is more important than ever that civilian readers have the access and background knowledge necessary to parse publicly available documents relating to space strategy so that they may effectively participate in the legislative and regulatory policymaking processes of their governments **NASA SP-7500** United States. National Aeronautics and Space Administration, **Metal Society #1 (Of 5)** Zack Kaplan, 2022-05-04 PORT OF EARTH writer ZACK KAPLAN teams up with hot up and coming artist GUILHERME BALBI in a dramatic new sci fi miniseries that's Blade Runner meets Rocky In an inverted future evolved robots have resurrected humans for manual labor When a tribalistic cultural clash breaks out a fearless human fighter and a frustrated displaced robot will square off in a public MMA style sport fight of epic stakes to determine once and for all who reigns supreme man or machine
