Footprints McLean Sibanda, 2021-09-06 *Footprints* is a captivating story about intellectual property IP. It speaks to its role in society, trade, industry and economy and expounds on the actual meaning of IP. The book lays a solid foundation for innovators, entrepreneurs, businesses and nations to realise their full potential through IP policy, legislation, use and practices. McLean Sibanda shares his personal story together with stories and testimonies of fellow travellers taking us through their journey into the field of IP. He meticulously recounts South Africa's path in transforming the management of IP emanating from publicly financed research and development, R & D development of critical human capital and other infrastructure to ensure effective IP commercialisation and technology transfer. *Footprints* is a timely masterpiece given IP issues in Africa's scramble for Covid-19 vaccines and implementation of the agreement establishing the African Continental Free Trade Area (AfCFTA). The book provides strategies of how African countries can use IP and innovation to develop industries to ensure health, security and trading of goods that can benefit from the AfCFTA. Narrated through a series of significant moments, *Footprints* demonstrates the importance of vision, solid foundation, collaboration, champions and intentional steps for economic transformation. With glimpses into how countries such as China and Korea used IP to develop their economies, this book makes a compelling case for embracing IP, increased R & D investment, relevant human capital and appropriate use of IP in the development of new products and services necessary for knowledge-based and industrialised economies. *Footprints* is a must-read for any academic, aspiring intellectual property scholar, policy maker, economist, development activist, entrepreneur, researcher, innovator, professional and technology transfer specialist. Intellectual property is everywhere around us and impacts our lives. For entrepreneurs and businesses alike, intellectual property is about value creation; it is the insurance you need for when you succeed. McLean Sibanda. *Higher Education in the Face of a Global Pandemic*, 2022-02-28. The book reflects on the extent to which the coronavirus COVID-19 pandemic influenced the education system in Africa, notably South Africa. The advent of the pandemic has brought a new context to the challenges of access, deepening the precarious position of African higher education systems. The pandemic underscored that African higher education systems are fragile and not uniformly resilient. The book discusses the challenges created or further entrenched by COVID-19 and how the typology of inequality across the differentiated institutions impacted the management of education delivery during COVID-19. Per se, lessons learned were documented to inform decision making and practice while drawing conclusions for future usage. Even though the shift to emergency remote teaching was not foreseen and thus not coordinated, the authors argue that students' learning styles, perceptions of online learning and digital pedagogy should be considered in the post-COVID-19 curricula development processes.
