Global Indian Diaspora Brinsley Samaroo, Primnath Goptar, Kumar Mahabir, 2021-11-22 Indian Diaspora World Convention was held in Trinidad in 2017 to commemorate the 1917 decision of the Indian Legislature to end

further recruitment of Indians for overseas indentured service This part is volume I of the two volume work Global Indian Diaspora It is a significant addition to current research on India s cultural expansion into the Atlantic and Pacific worlds In this volume the former indentured Empire speaks back giving its side of the narrative not in an apologetic accounting but rather on the positive side in diverse ways The Girmityas lit agreement signers maintained their core values using these to gain anchorage in the new places At the same time they prudently took advantage of agencies such as the Canadian Mission to gain admission to the wider westernized community They maintained ties with India through frequent visits of Indian scholars and missionaries They equally preserved their cultural observances derived from Indian antiquity adding diversity to the colonial society All of these elements combine to give a refreshing perspective on the globalization of the world which started long before all the time Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka *Strategies for Facilitating Inclusive Campuses in Higher Education* Jaimie Hoffman,Patrick Blessinger,Mandla Makhanya,2019-07-25

Corrupted Jonathan D Jansen,2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won t be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly Circular Economy for Buildings and Infrastructure Jian Zuo,Liyin Shen,Ruidong Chang,2024-05-03

This edited volume covers theoretical and practical aspects of circular economy in building

development offering chapters dealing with topics such as material design affordability of housing development waste management and recycling smart metering and more A particular focus is placed on various stakeholders points of view The book's chapters are co developed and contributed by multidisciplinary teams including both academics and industry practitioners The case study oriented approach taken here helps to facilitate the reader's understanding of how building sustainability can be achieved in the context of circular economy The building industry has significant environmental social and economic impacts As one of the biggest energy consumers and carbon emitters building sustainability has attracted wide attention globally Building projects and their associated activities consume a large amount of energy natural resources and water while producing a large proportion of wastes throughout their lifecycles The traditional linear approach of make use and dispose has been heavily criticized whilst the circular approach has gained momentum Indeed circular economy has emerged as one of key principles to manage sustainability related issues by means of focusing on the circularity of resources as well as the cost implications

Becoming a teacher Josef de Beer, 2020-12-31 This book disseminates original research on learning in and from practice in pre service teacher education Authors such as Lederman and Lederman describe the student teaching practicum or work integrated learning WIL which is an essential component of pre service teacher education as the elephant in the room These authors note that the capstone experience in any teacher education programme is the student teaching practicum after all this is where the rubber hits the road However many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher This is the gap that this research book addresses Most of the chapters in the book report empirical data with the exception of two chapters that can be categorized as systematic reviews WIL is addressed from various angles in the chapters Chapter 6 focuses on research related to what makes Finnish teacher education so effective and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school based on Finnish insights in Johannesburg Chapter 3 highlights the challenges faced in open and distance learning teacher education contexts Several of the chapters disseminate research findings on alternative interventions to classic WIL namely where safe spaces or laboratories are created for student teachers to learn and grow professionally These could either be simulations such as software programmes and avatars in the intervention described in Chapter 2 student excursions as the findings in chapters 5 7 and 10 portray or alternative approaches to WIL e.g Chapters 11 and 12 The book is devoted to scholarship in the field of pre service teacher education The target audience is scholars working in the fields of pre service teacher education work integrated learning and self directed learning The book makes a unique contribution in terms of firstly its extensive use of Cultural Historical Activity Theory as a research lens and secondly in drawing on various theoretical frameworks Both quantitative and qualitative research informed the findings of the book

Green Lands for White Men Meredith McKittrick, 2024-10-08 How an audacious environmental engineering plan fanned white settlers visions for South Africa stoked mistrust in scientific experts and gave rise to the Apartheid state In 1918 South Africa s climate seemed to be drying up White farmers claimed that rainfall was dwindling while nineteenth century missionaries and explorers had found riverbeds seashells and other evidence of a verdant past deep in the Kalahari Desert Government experts insisted however that the rains weren t disappearing the land long susceptible to periodic drought had been further degraded by settler farmers agricultural practices an explanation that white South Africans rejected So when the geologist Ernest Schwarz blamed the land itself the farmers listened Schwarz held that erosion and topography had created arid conditions that rainfall was declining and that agriculture was not to blame As a solution he proposed diverting two rivers to the Kalahari s basins creating a lush country where white South Africans could thrive This plan which became known as the Kalahari Thirstland Redemption Scheme was rejected by most scientists But it found support among white South Africans who worried that struggling farmers undermined an image of racial superiority *Green Lands for White Men* explores how white agriculturalists in southern Africa grappled with a parched and changing terrain as they sought to consolidate control over a Black population Meredith McKittrick s timely history of the Redemption Scheme reveals the environment to have been central to South African understandings of race While Schwarz s plan was never implemented it enjoyed sufficient support to prompt government research into its feasibility and years of debate McKittrick shows how white farmers rallied around a plan that represented their interests over those of the South African state and delves into the reasons behind this schism between expert opinion and public perception This backlash against the predominant scientific view McKittrick argues displayed the depth of popular mistrust in an expanding scientific elite A detailed look at the intersection of a settler society climate change white nationalism and expert credibility *Green Lands for White Men* examines the reverberations of a scheme that ultimately failed but influenced ideas about race and the environment in South Africa for decades to come
