Abbasi, Hasan Tahir Abbas, Akram Alomainy, Muhammad Ali Imran, 2021-04-06 Backscattering and RF Sensing for Future Wireless Communication Discover what lies ahead in wireless communication networks with this insightful and forward thinking book written by experts in the field Backscattering and RF Sensing for Future Wireless Communication delivers a concise and insightful picture of emerging and future trends in increasing the efficiency and performance of wireless communication networks The book shows how the immense challenge of frequency saturation could be met via the deployment of intelligent planar electromagnetic structures It provides an in depth coverage of the fundamental physics behind these structures and assesses the enhancement of the performance of a communication network in challenging environments like densely populated urban centers The distinguished editors have included resources from a variety of leading voices in the field who discuss topics such as the engineering of metasurfaces at a large scale the electromagnetic analysis of planar metasurfaces and low cost and reliable backscatter communication All of the included works focus on the facilitation of the development of intelligent systems designed to enhance communication network performance Readers will also benefit from the inclusion of A thorough introduction to the evolution of wireless communication networks over the last thirty years including the imminent saturation of the frequency spectrum An exploration of state of the art techniques that next generation wireless networks will likely incorporate including software controlled frameworks involving artificial

intelligence An examination of the scattering of electromagnetic waves by metasurfaces including how wave propagation differs from traditional bulk materials A treatment of the evolution of artificial intelligence in wireless communications Perfect for researchers in wireless communications electromagnetics and urban planning Backscattering and RF Sensing for Future Wireless Communication will also earn a place in the libraries of government policy makers technologists and telecom industry stakeholders who wish to get a head start on understanding the technologies that will enable tomorrow's wireless communications

Ecological, efficient and low-carbon cereal-legume intercropping systems Lingyang Feng, Muhammad Ali Raza, Feng Yang, 2023-09-28 Integrated Terrestrial and Non-Terrestrial Networks Muhammad Ali Jamshed, Ali Nauman, 2024-09-27 This book aims to address a wide range of topics in wireless satellite communications to tackle the issues related to the integration of terrestrial networks TN with non terrestrial networks NTN In Release 17 the third generation partnership project 3GPP proposed the standardization of NTN to allow 5G based TN to support NTN According to Release 17 the NTN will consist of satellites with unmanned aerial vehicles UAVs and high altitude platforms HAPs regarded as specific use cases of NTN Similar to the Global Positioning System GPS signals based on NTN are unable to provide indoor coverage as these signals are attenuated and scattered by roofs walls etc Moreover power and delay are critical factors that restrict a cellular enabled mobile handset from achieving reliability seamless coverage and low latency while relying on NTN This book has brought together multidisciplinary contributors in the field of wireless satellite communications to identify and present technical challenges and recent results related to the design of energy efficient delay tolerant and enhanced coverage based integrated TN and NTN Given that challenges and future aspects are also considered the book covers a wide variety of subject categories and would therefore benefit a larger readership in the scientific community
