 Newman,2013-11-05 An excellent examination of how the collapse of the Soviet Union and the impact of globalization have
 brought about changes not only to the territorial configuration sovereignty of states and their boundaries but also to
 traditional notions of state boundaries sovereignty and social order These essays focus on the key regional and geopolitical
 characteristics of this global reordering with an emphasis on Eastern Europe and South Asia They discuss the territorial
 reordering which is taking place at the level of the state as boundaries are redemarcated in line with ethno territorial
 demands as borders are transversed by the movement of peoples information and finance and as the lines of territorial
 demarcation are perceived not only in terms of their fixed characteristics but as part of a process through which regional and
 ethnic identities continue to be formed and reformed Each section ends with articles which focus on literature on geopolitics
 and boundaries This is an invaluable addition to our understanding of contemporary world affairs Post-Pandemic Crisis
