Before You Read

In the last chapter, you read about human geography—the way humans in general relate to their environment. In this section, you will learn about the physical features and resources of the United States and Canada.

As You Read

Use a graphic organizer to take notes about the landforms and resources of the United States and Canada.

LANDSCAPE INFLUENCED DEVELOPMENT (Page 117)
How vast are these countries?

The United States and Canada occupy the central and northern four-fifths of the continent of North America. Culturally, the region is known as Anglo America. This is because both countries were colonies of Great Britain at one time and because most of the people speak English. In addition to their physical geography and cultural heritage, the two countries are also bound together by strong economic and political ties.

The United States and Canada stretch across North America. In total area, they are the second (Canada) and third (the United States) largest countries in the world, behind Russia.

The United States and Canada are rich in natural resources. They have much fertile soil and water and many forests and minerals. This geographic richness has attracted immigrants from around the world for centuries.

1. What binds Canada and the United States together?

MANY AND VARIED LANDFORMS (Pages 119–121)
What features do these countries share?

All the major types of landforms are found in the United States and Canada.
