the absence of one of these things are easy it is not so easy to fathom the complete nothingness viz the universal void Although we have a very good understanding of nothingness or equivalently a zero today our forefathers had devoted countless hours and arrived at the representation and integration of zero and its compatibility not only with all non zero numbers but also with all conceivable environments only after many painstaking centuries Zero can be viewed perceived in two distinct forms i as a number in our mundane affairs and ii as the horrific void or Absolute Reality in the spiritual plane the ultimate state of mind Presented are the reasons why zero is a landmark discovery and why it has the potential to conjure up in an intense thinker the dreadful nothingness unlike those of other numbers such as 1 2 and 3 Described are the representation of zero and its history including its deeper understanding via calculus its occurrences and various roles in different countries as well as in sciences engineering along with a stress on the Indian zero that is accepted as the time invariant unique absolute zero This is followed by the significant distinction between mathematics and computational mathematics and the concerned differences between the unique absolute zero and non unique relative numerical zeros and their impact and importance in computations on a digital computer Introduces the history of the value of zero and why it was a landmark discovery Discusses how zero is used in science and engineering and its use in different countries Explains how zero affects different mathematics and calculus *Zero* Springtide Press,2014 *Zero Plus One* J. A Bell Curve Andrew Friend,2011-06-07 From earliest times humanity has sought to understand its place and role in the world has sought for meaning Wherever human beings are to be found myth and extra historical record of who we are has always played a vital

role in this regard Traditional religion by comparison has only emerged in the last 2 500 years This book summarizes the history of mans religious endeavors and shows how much of religion over time has anything but aided its followers in their journey through life Because traditional religion is failing to meet our spiritual needs people are moving from heteronomy to autonomy as they assume responsibility for their own journeys A continuing survey begun at the turn of the century reveals that 36 percent of the participants believe that the American dream is achieved through spiritual fulfillment A never ending stream of articles in a variety of journals bear witness to the this trend as well as to the many new means now exercised in order to nourish ones spirituality The relevance of myth has been renewed while that of religion is in decline in the West Martin Luthers pronouncement Every man is a priest is becoming a fact
