Integral Green Zimbabwe Elizabeth Mamukwa, Ronnie Lessem, Alexander Schieffer, 2016-05-23 *Integral Green Zimbabwe An African Phoenix Rising* by Ronnie Lessem Alexander Schieffer and Liz Mamukwa is the first book in the *Integral Green Society and Economy* series a series which has three overarching aims The first aim is to link together two major movements of our time one philosophical the other practical The philosophical movement is towards what many today are calling an integral age while the practical is the green movement duly aligned with that of sustainable development The second is to blend together elements of nature and community culture and spirituality science and technology politics and economics thus serving to bring about an integral green vision albeit with a focus on business and economics As such the authors transcend the limitations to sustainable development and environmental economics which are overly ecological if not also technological in orientation and exclude social and cultural elements Thirdly this particular volume focuses specifically on Zimbabwe as well as Southern Africa drawing on the particular issues and capacities that this country and region represents The emphasis on Zimbabwe and Southern Africa transpired not only because two of the editors Lessem and Mamukwa are Zimbabwean in origin but because Zimbabwe is today like a phoenix rising from the ashes and has the opportunity to recreate itself anew

The Green Book ,2004 **Fourth International Handbook of Mathematics Education** M.A. (Ken)

Clements, Berinderjeet Kaur, Thomas Lowrie, Vilma Mesa, Johan Prytz, 2024-11-19 This fourth international handbook discusses developments not recognized or dealt with fully in the first three Springer Mathematics Education handbooks and tackles controversial issues in the field After starting with a provocative introductory chapter which asks whether controversy is a healthy feature of international mathematics education the four following sections cover a mathematics education in Asia b the roles of theory in research and practice c equity and social justice and d curriculum and change These themes are taken up in 28 chapters by 60 authoritative authors from all continents Each of the four sections is structured on the basis of past present and future aspects Like the first three mathematics education handbooks this handbook provides a very valuable resource for teachers mathematics education practitioners and researchers education policy makers and mathematicians as well as graduate and undergraduate students
