Zimsec Physical Science Paper 3 2013:

Gendered Spaces, Religion and Migration in Zimbabwe Ezra Chitando, Sophia Chirongoma, Molly

Manyonganise, 2022-10-12 This book explores the intersections of gender, religion and migration within the context of post-independent Zimbabwe with a specific focus on how gender disparities impact economic development. By demonstrating how these interconnections impact women's and girls' lived realities, the book addresses the need for gender equity, gender inclusion and gender mainstreaming in both religious and societal institutions. This book assesses the gender and migration nexus in Zimbabwe and examines the impact of religious and cultural ideologies on the status of women. In doing so, it assesses the transition of Zimbabwean women across spaces and provides insights into the practical strategies that can be utilised to improve their status both at home and on the move. Furthermore, chapters show how space continues to be gendered in ways that perpetuate structural inequality to challenge the exclusion of women from key social processes. Contributing to ongoing scholarly debates on gender in Africa, this book will be of interest to academics and students of Gender Studies, Women's Studies, African Studies, Development Studies, as well as advocates of human rights and gender activists.

Climate Action in Southern Africa Philani Moyo, 2023-10-27 Using climate justice as an analytical tool, this volume examines the role of local mitigation and adaptation actions in Southern Africa in furthering climate resilient development. Climate Action in Southern Africa examines the intrinsic connection between local climate actions, climate resilient development and strides towards a just transition. The theoretical grounding in climate justice allows the authors to analyse whether current climate actions in Africa are truly effective for the poor and marginalised whose lives and livelihoods are impacted by a climate crisis largely not of their making. The authors also question the extent to which pathways to net zero carbon emissions by 2050 are achievable in Africa and ask whether this can be attained without undermining livelihoods and human development. Overall, this book argues that for any transition to be a just transition, it has to be aligned with the pursuit of sustainable development and climate justice for current and future generations on the African continent. Drawing out key factors including politics, gender and migration, this volume will be of great interest to students and scholars of climate change, climate justice and African development.
