transformed themselves from places created largely for entertainment to globally connected institutions that emphasize care through conservation and education Zoos naturalize their spaces classify their animals and produce spectacular experiences for their human visitors Zoos name register track and allocate their animals in global databases Zoos both abide by and create laws and industry standards that govern their captive animals Finally zoos intensely govern the reproduction of captive animals carefully calculating the life and death of these animals deciding which of them will be sustained and which will expire Zooland takes readers behind the exhibits into the world of zoo animals and their caretakers And in so doing it turns its gaze back on us to make surprising interconnections between our understandings of the human and the nonhuman

Tripp York,2015-07-30 In The End of Captivity Tripp York addresses how we talk about the good of other animals in light of a stark impossibility their freedom from us While all of us in the animal and plant kingdom are interdependent upon one another humans are unique in that we are the only animals who keep other animals captive We keep animals in zoos sanctuaries circuses conservatories aquariums research facilities slaughterhouses and on our farms and in our homes York asks what such forms of captivity say about us and how animal captivity shapes what we imagine to be the purpose of other animals What does the fact that elephants tigers and horses perform in circuses say about how we see the world What does the reality of zoological parks say about the people who create support decry protest and patronize them How important is wildlife conservation for the good of the earth What does who we put on our plate say about how we understand the theological role of other animals These are just a few questions York tackles as he weaves through the convoluted politics surrounding the captive animals in our midst **Oikos: God's Big Word for a Small Planet** Andrew Francis,2017-04-25 How you spend your time and money controls what happens on this planet Planet Earth and its people are in danger We face ongoing economic and ecological crises These will deepen unless all of God s people begin to act as one global community Natural resources are diminishing and the economic world order is changing We cannot go on living as though we can call up another planet Change is needed now and this book addresses that The biblical vision of the world as oikos meaning household is God s challenge to all people about the way we live now and in the future Oikos affirms the need for reconciliation and peace between faiths and nations and should determine our economic practices and how we care for the planet In this timely and challenging book is a renewed call to follow the Maker s instructions Whether it is 9 11 Chernobyl or the 2008 financial crash that call for change is repeating itself This book not only explains why we need to change but also provides practical advocacy of how you can help to achieve it The Art of Creative Research Philip Gerard,2017-02-23 A guide to finding and using information that enriches your fiction nonfiction or poetry filled with anecdotes from a wide range of writers Choice All writers conduct research For some this means poring over records and combing archives but for many creative writers research happens in the everyday world when they scribble an observation on the subway when they travel to get the feel for a city or when they strike up a

conversation with an interesting stranger The Art of Creative Research helps writers take this natural inclination to explore and observe and turn it into a workable and enjoyable research plan It shows that research shouldn't be seen as a dry plodding aspect of writing Instead it's an art that all writers can master one that unearths surprises and fuels imagination This lends authenticity to fiction and poetry as well as nonfiction Philip Gerard distills the process into fundamental questions How do you conduct research And what can you do with the information you gather He covers both in person research and work in archives and illustrates how the different types of research can be incorporated into stories poems and essays using examples from a wide range of writers as well as his own projects Throughout he brings knowledge from his seasoned background into play drawing on his experiences as a reporter and a writer of both fiction and nonfiction His enthusiasm for adventure is infectious and will inspire writers to step away from the keyboard and into the world Gerard just flat out gets it He understands that research is at its core about the human need to know an indispensable book Joe Mackall author of Plain Secrets An Outsider among the Amish *Animals Behaving Badly* Linda Lombardi, 2011-10-04 There's a lot that animals don't want you to know and the better their public image the worse their secrets are gang rapist dolphins lazy infanticidal lions and of course our own dogs who eat our money set our houses on fire and in more than one case actually shoot their owners with guns *Animals Behaving Badly* shows that animals are just like us gluttonous selfish violent lustful and always looking out for number one Using anecdotes from the news and from scientific research Linda Lombardi pokes fun at our softhearted preconceptions about animals makes us feel a little better about humanity's basest impulses and painlessly teaches us a bit more about our furry and feathered friends You'll learn Bees love alcohol even says one researcher more than college students Pandas enjoy pornographic movies they're particularly aroused by the soundtrack and macaques will pay with juice to look at dirty pictures A rabbit who lives in a pub in England is addicted to gambling with a slot machine African elephants raised by teenage mothers form violent youth gangs *De vandrande djurens värld : En upptäcktsfärd mellan ishav, savann och stängsel* Nina Burton, 2025-09-19 När jag försöker definiera friheten drar den sig undan ordens gränser Men jag vet att den för vilda djur är ihop med naturen de lever i och när vi tar över den försvinner de En helstdag packar jag för att bege mig till ett land där man nästan kan se dem leva i sin egen värld De vandrande djurens värld är en storartad resa in i det vilda djurriket och dess händelserfulla livsformer Här kan man se knävalar dansa utforska hyenors kretsar och förundras över markattornas språk sinne allt förmedlat på Nina Burtons omisskännliga språk som rymmer både analys och mirakel **Directions in Sound** WFIU (Radio station : Bloomington, Ind.), 2015 **Indian National Bibliography** B.
