

ZyXEL business access point with 802.11n

ZyXEL is one of the first manufacturers to launch a business access point in accordance with 802.11n, the NWA-3165. It uses MIMO technology (multiple in, multiple out) which ensures high reliability and high performance when operating wireless LANs. The NWA-3165 is flexible and ideally suited to applications in the healthcare sector or for production and logistics services.

Net throughput of up to 100 Mbps!

Until now, rates this fast were only possible via Ethernet connections. MIMO technology uses multiple antennas for transmission and can even increase throughput rates by making use of otherwise undesired reflections. This improves WLAN coverage and eliminates so-called dead spots.

Wi-Fi n/b/g certified

The ZyXEL NWA-3165 is certified in accordance with the most recent draft of the standard, IEEE 802.11n Draft 2.0. This guarantees maximum compatibility for professional WLANs. Since 802.11n is backward compatible to 802.11b/g, NWA-3165 offers a high degree of investment protection.

802.11a, g or n?

Of course the question arises of which technology is best and when. In addition to 802.11n, ZyXEL also offers 11a and g products. Finding the right one depends on its intended use. If the installation of a dense network of access points makes cell planning more complex, 11a or g is recommended. 802.11n makes cell planning more difficult since two channels are bundled. 802.11n, on the other hand, is ideal for high transmission rates. While the NWA-3165 is equipped with built-in omnidirectional antennas, external antennas can be used for the NWA-3100, 3160 and 3500 models.

ZyXEL NWA-3165
