

William Optics 90° Diagonal Mirror Cleaning Instructions

Take proper care of your diagonal and it will last a lifetime!

Cleaning a WO Diagonal is an easy task. Nonetheless it should not be performed more than 5 times per year for Dielectric coating (2 for other coatings) and only when strictly necessary. A bit of dust does not generally reduce performance much, and the more often you clean it, the more the chances it'll get scratched!

William Optics Warranty will remain valid unless damage is caused to the diagonal due to inappropriate cleaning or misuse.

The necessary tools are a 5/64 Hex Key, a hand blower/puffer bulb, a clean soft-paper tissue, and clean running tap water or distilled water.

The diagonal is designed so that it's not possible to touch the mirror with your fingers and smudge it. The most it should get is a bit of dust from time to time.

Work only in a dust-free environment and in broad daylight, with clean hands and on a clean surface. Remove the two side plates, making sure you do not drop any screws. Slightly push the mirror flat from the side out of its base, being careful not to touch the coated surface with your fingers.
