Beery, Sarah J. Greenwald, Cathy Kessel, 2022-04-21 The Association for Women in Mathematics AWM the oldest organization in the world for women in mathematics had its fiftieth anniversary in 2021 This collection of refereed articles illustrated by color photographs reflects on women in mathematics and the organization as a whole Some articles focus on the situation for women in mathematics at various times and places including other countries Others describe how individuals have shaped AWM and in turn how the organization has impacted individuals as well as the broader mathematical community Some are personal stories about careers in mathematics Fifty Years of Women in Mathematics Reminiscences History and Visions for the Future of AWM covers a span from AWM s beginnings through the following fifty years The volume celebrates AWM and its successes but does not shy away from its challenges The book is designed for a general audience It provides interesting and informative reading for people interested in mathematics gender equity or organizational structures teachers of mathematics students at the high school college and graduate levels and members of more recently established organizations for women in mathematics and related fields or prospective founders of such organizations Sotheran's Price Current of Literature Henry Sotheran Ltd, 1909 **Essays in Humanistic Mathematics** Alvin Murray White, 1993 The mathematics presented in this volume goes beyond the facts formulas and algorithms that most students associate with mathematics to a presentation of mathematics as an intellectual discipline with a human perspective and a history that matters Humanistic mathematics challenges dogmatic teaching styles that expect students to parrot the lecturer It demands creativity from both the teacher and student Humanistic mathematics carries with it an awareness of and a sensitivity to those things

mathematics shares with the other humanities Humanistic dimensions of mathematics include An appreciation of the role of intuition in understanding and creating concepts that appear in their finished version to be the result of a merely technical process An understanding of the value judgements in the growth of any discipline Logic alone never completely accounts for what is investigated how it is investigated or why it is investigated The movement which began as the personal vision of a few has now become a major part of mathematical culture What was viewed with skepticism is now accepted and expected Humanistic mathematics is a recent rediscovery of an idea that goes back to Plato D Alembert Wilder Bronowski Cassirer It has provided a vocabulary for previously unarticulated concepts and approaches There are no answers to the question what is important in mathematics We can only ask what is important in mathematics to human beings with given abilities and limitations at a given point in their mathematical development
