Communication in Autism Joanne Arciuli, Jon Brock, 2014-10-15 *Communication in Autism* adopts a multidisciplinary approach to explore one of the most common developmental disorders associated with communication impairment. Perhaps the most fascinating thing about communication in autism is that variation is as extreme as it could possibly be. While some individuals with autism have age appropriate language a number have exceptional language skills others have little or no spoken language. In between these extremes are individuals who experience significant linguistic impairments. These impairments can affect peer relations and literacy skills. The chapters in this volume provide comprehensive coverage of both the theoretical underpinnings and the practical aspects of autistic communication. The result is a volume that showcases the wide range of methodologies being used in this field of research. It is invaluable for scientists, service providers, parents, individuals with autism and students learning about communication and autism e.g. in psychology, speech pathology and education.

The Future of Play Theory Anthony D. Pellegrini, 1995-08-10 This multidimensional book looks at the current status of play theory across the disciplines literally from anthropology to zoology. The authors examine play phenomena from four perspectives: Play as Progress, Play as Power, Play as Fantasy and Play as Self. The volume is concluded with a challenge for future study by Brian Sutton-Smith. With the wealth of information gathered here, this book will serve as an invaluable reference tool, textbook and source of inspiration for all those interested in the fascinating study of children's play.

Pictures for Language Learning Andrew Wright, 1989-11-16 This richly illustrated book provides a valuable guide to the role of pictures and other visual materials in language teaching. It brings together a wealth of ideas on how to use pictures in a wide range of language learning situations. The first section discusses the contribution visuals can make to all the classroom settings in providing real opportunities for students to communicate whether they are working as a class, in groups or in pairs. Sections B and C contain over 200 practical suggestions for picture-generated language work. These make use of visual materials which are readily available to teachers anywhere or illustrations which have been kept simple so that they can be copied easily. The activities can be

integrated into all stages of the language teaching process and advice is given on how to adapt the ideas to suit different teaching environments The final section describes the process of setting up a picture library and offers guidance on where to begin looking for visuals how to categorise pictures and different methods of storage
