Building Content Literacy Roberta L. Sejnost, Sharon M. Thiese, 2010-02-26 Secondary teachers will find that this superb resource informs the teaching and learning of their students and provides many research-based strategies to enhance reading comprehension and written language in every area. Johnneen Griffin, Director of Secondary Pupil Services, Olentangy Local Schools, Lewis Center, OH. Sejnost and Thiese address the national literacy crisis with a practical guidebook that meets the needs of adolescent learners by focusing on the literacy skills needed for the 21st century. The strategies engage learners and create independence in content area reading. Rusti Russow, Director of Teaching and Learning, Kankakee School District, IL. Increase adolescent learners' success in all content areas. Responding to the challenges associated with teaching middle and high school students, this resource offers specific strategies teachers may use to incorporate reading, writing, and critical thinking throughout content instruction to increase learning. With step-by-step instructions, a wealth of examples, and numerous student reproducibles, the book presents an approach that secondary teachers can implement across all content areas. Roberta L. Sejnost and Sharon M. Thiese focus on research-based practices that increase comprehension and learning while meeting standards, including Techniques that foster the acquisition and retention of specialized and technical content vocabulary, Processes to help students better comprehend narrative and expository texts, Approaches to help students use writing and speaking to process their new knowledge and make it their own, Techniques for promoting the literacies needed to effectively use various media sources, Methods for scaffolding instruction for students with special needs. Building Content Literacy is an ideal resource for delivering developmentally appropriate learning experiences and strengthening adolescent's academic achievement in every content area.

Getting to the Common Core Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation, and teachers are in the process of getting to the core of these standards. Teaching to standards is not a new concept; teachers have adapted to new standards

every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Value s of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research
