Strange Rebels 1979 And The Birth Of The 21st Century:

Strange Rebels Christian Caryl, 2014-03-11 Few moments in history have seen as many seismic transformations as 1979. That single year marked the emergence of revolutionary Islam as a political force on the world stage, the beginning of market revolutions in China and Britain that would fuel globalization and radically alter the international economy, and the first stirrings of the resistance movements in Eastern Europe and Afghanistan that ultimately led to the collapse of the Soviet Union. More than any other year in the latter half of the twentieth century, 1979 heralded the economic, political, and religious realities that define the twenty-first. In *Strange Rebels*, veteran journalist Christian Caryl shows how the world we live in today and the problems that plague it began to take shape in this pivotal year. 1979, he explains, saw a series of counterrevolutions against the progressive consensus that had dominated the postwar era. The year's epic upheavals embodied a startling conservative challenge to communist and socialist systems around the globe, fundamentally transforming politics and economics worldwide. In China, 1979 marked the start of sweeping market-oriented reforms that have made the country the economic powerhouse it is today. 1979 was also the year that Pope John Paul II traveled to Poland, confronting communism in Eastern Europe by reigniting its people's suppressed Catholic faith. In Iran, meanwhile, an Islamic Revolution transformed the nation into a theocracy almost overnight, overthrowing the Shah's modernizing monarchy. Further west, Margaret Thatcher became prime minister of Britain, returning it to a purer form of free market capitalism and opening the way for Ronald Reagan to do the same in the US. And in Afghanistan, a Soviet invasion fueled an Islamic holy war with global consequences; the Afghan mujahedin presaged the rise of al Qaeda and served as a key factor along with John Paul's journey to Poland in the fall of communism. Weaving the story of each of these counterrevolutions into a brisk, gripping narrative, *Strange Rebels* is a groundbreaking account of how these far-flung events and disparate actors and movements gave birth to our modern age.

The Longest Two Decades of the US: The Story of Four Crises Kılıç Buğra

Kanat, 2025-09-26 This book chronicles the pivotal transformations in the United States from 2001 to 2021, with a particular focus on its evolving global image, internal political dynamics, and economic landscape. The phrase "the long two decades" describes a period characterized by a succession of four major crises that profoundly impacted American society and politics: the 9/11 attacks, the invasion of Iraq, the Great Recession, and the COVID-19 pandemic. Intriguingly, these contemporary crises parallel four significant events of the 20th century: Pearl Harbor, the Vietnam War, the Great Depression, and the Spanish Flu, that similarly reshaped the nation's political and social landscape. The book provides historical contexts, examines the duration of these crises, and explores their aftermath effects on American society while also underscoring the unique differences among them.

The Ends of Modernization David Johnson Lee, 2021-08-15 The Ends of Modernization studies the relations between Nicaragua and the United States in the crucial years during and after the Cold War David Johnson Lee charts the transformation of the ideals of modernization national autonomy and planned development as they gave way to human rights protection neoliberalism and sustainability Using archival material newspapers literature and interviews with historical actors in countries across Latin America the United States and Europe Lee demonstrates how conflict between the United States and Nicaragua shaped larger international development policy and transformed the Cold War In Nicaragua the backlash to modernization took the form of the Sandinista Revolution which ousted President Anastasio Somoza Debayle in July 1979 In the wake of the earlier reconstruction of Managua after the devastating 1972 earthquake and instigated by the revolutionary shift of power in the city the Sandinista Revolution incited radical changes that challenged the frankly ideological and economic motivations of modernization In response to threats to its ideological dominance regionally and globally the United States began to promote new paradigms of development built around human rights entrepreneurial internationalism indigenous rights and sustainable development Lee traces the ways Nicaraguans made their country central to the contest over development ideals beginning in the 1960s transforming how political and economic development were imagined worldwide By illustrating how ideas about ecology and sustainable development became linked to geopolitical conflict during and after the Cold War The Ends of Modernization provides a history of the late Cold War that connects the contest between the two then prevailing superpowers to trends that shape our present globalized multipolar world

Nationalism Eric Storm, 2024-10-29 A global perspective on the nature and evolution of nationalism from the early modern era to the present The current rise of nationalism across the globe is a reminder that we are not after all living in a borderless world of virtual connectivity In Nationalism historian Eric Storm sheds light on contemporary nationalist movements by exploring the global evolution of nationalism beginning with the rise of the nation state in the eighteenth century through the revival of nationalist ideas in the present day Storm traces the emergence of the unitary nation state which brought citizenship rights to some while excluding a multitude of others and the pervasive spread of nationalist ideas through politics and culture Storm shows how nationalism influences the arts and humanities mapping its dissemination through newspapers television and social media Sports and tourism too have helped fashion a world of discrete nations each with its own character heroes and highlights Nationalism saturates the physical environment not only in the form of national museums and patriotic statues but also in efforts to preserve cultural heritage create national parks invent ethnic dishes and beverages promote traditional building practices and cultivate native plants Nationalism has even been used for selling cars furniture and fashion By tracing these tendencies

across countries Storm shows that nationalism's watershed moments were global. He argues that the rise of new nation states was largely determined by shifts in the international context that the relationships between nation states and their citizens largely developed according to global patterns and that worldwide intellectual trends influenced the nationalization of both culture and environment. Over the centuries, nationalism has transformed both geopolitics and the everyday life of ordinary people.

French Mediterraneans Patricia M. E. Lorcin, Todd Shepard, 2016-05 While the Mediterranean is often considered a distinct unified space, recent scholarship on the early modern history of the sea has suggested that this perspective is essentially a Western one devised from the vantage point of imperial power that historically patrolled the region's seas and controlled its ports. By contrast, for the peoples of its southern shores, the Mediterranean was polymorphous, shifting with the economic and seafaring exigencies of the moment. Nonetheless, by the nineteenth century, the idea of a monolithic Mediterranean had either been absorbed by or imposed on the populations of the region. In *French Mediterraneans*, editors Patricia M. E. Lorcin and Todd Shepard offer a collection of scholarship that reveals the important French element in the nineteenth and twentieth century creation of the singular Mediterranean. These essays provide a critical study of space and movement through new approaches to think about the maps, migrations, and margins of the sea in the French imperial and transnational context. By reconceptualizing the Mediterranean, this volume illuminates the diversity of connections between places and polities that rarely fit models of nation-state allegiances or preordained geographies.

Your Country, My Country Robert Bothwell, 2015-09-22 Canada: land of hockey, terrible weather, unfailing politeness, and little else, as far as many Americans are aware. For Canadians, the United States is seen as a land of unparalleled opportunity and unparalleled failure, a country of heights and abysses. The straitlaced country in the north could hardly have much to tell about its powerhouse of a neighbor to the south, eh? Not so, according to historian Robert Bothwell. In this witty and accessible book, Bothwell argues that the shared history of the United States and Canada reveals more about each country than most would suspect. *Your Country, My Country* takes readers back to the seventeenth century when a shared British colonial heritage set the two lands on paths that would remain intertwined to the present day. Tracing Canadian-American relations, shared values, and differences through the centuries, Bothwell suggests that Americans are neither unique nor exceptional in terms of both their good characteristics and their bad ones. He brings this contention down to the present day by examining Canadian and American differences over such questions as universal health care in domestic policy and the Iraq war in foreign policy. What happens in Canada often reflects what has happened in the United States, but by the same token, what happens in Canada signals what could happen in its American neighbor. From whatever direction this innovative volume contends, Canada's story illuminates America's and vice versa.

Circumcised and Veiled Women Debangana Chatterjee, 2023-08-11 The book unravels the politics of representation and the process of exoticising women's bodies through the prism of external gaze and knowledge production. It brings out the intricacies of representational discourses around cultural practices of female circumcision (FC), female genital cutting (FGC) and Islamic veiling. Focusing on crucial international legal texts and national legislation, the book gives an overview of the cultural nuances in FC, FGC and juxtaposes it with the Indian variation, khafz. The author studies the international veiling narratives that conjure up a fractured discourse containing aspects of colonialism, Islamophobia and Islamic fashion and maps them with the regional variations of Islamic purdah in India. The volume explores the cultural practice of khafz and purdah through narratives in India, portraying how representational factors from international discourses reflect on the Indian context and vice versa. Amid the world of binaries and polarised opinions, the book offers a nuanced analysis of the space in between, characterised by narratives from women. By situating women's narratives in relation to family, community, state and international politics, the book explores the global Indian interplay of discourses on FC, FGC and Islamic veiling. This volume will be of interest to scholars, students and readers of gender studies, feminism, cultural and religious studies, sociology, South Asian studies and International Relations.
