Strange Defeat Marc Bloch:

Strange Defeat Marc Bloch, 2021-11-09T16:36:00Z A renowned historian and Resistance fighter later executed by the Nazis analyzes at first hand why France fell in 1940 Marc Bloch wrote *Strange Defeat* during the three months following the fall of France after he returned home from military service In the midst of his anguish he nevertheless brought to his study of the crisis all the critical faculty and all the penetrating analysis of a first rate historian Christian Science Monitor Bloch takes a close look at the military failures he witnessed examining why France was unable to respond to attack quickly and effectively He gives a personal account of the battle of France followed by a biting analysis of the generation between the wars His harsh conclusion is that the immediate cause of the disaster was the utter incompetence of the High Command but his analysis ranges broadly appraising all the factors social as well as military which since 1870 had undermined French national solidarity Much has been and will be written in explanation of the defeat of France in 1940 but it seems unlikely that the truth of the matter will ever be more accurately and more vividly presented than in this statement of evidence New York Times Book Review The most wisdom packed commentary on the problem set before all intelligent and patriotic Frenchmen by the events of 1940 Spectator

Strange Defeat Marc Bloch, 1967 A renowned historian and Resistance fighter later executed by the Nazis analyzes at first hand why France fell in 1940 *Fifty Key Thinkers on History* Marnie Hughes-Warrington, 2014-09-04 *Fifty Key Thinkers on History* is an essential guide to the most influential historians theorists and philosophers of history The entries offer comprehensive coverage of the long history of historiography ranging from ancient China Greece and Rome through the Middle Ages to the contemporary world This third edition has been updated throughout and features new entries on Machiavelli Ranajit Guha William McNeil and Niall Ferguson Other thinkers who are introduced include Herodotus Bede Ibn Khaldun E H Carr Fernand Braudel Eric Hobsbawm Michel Foucault Edward Gibbon Each clear and concise essay offers a brief biographical introduction a summary and discussion of each thinker's approach to history and how others have engaged with it a list of their major works and a list of resources for further study *Annales* Stuart Clark, 1999 This collection reprints key articles written within the past 30 years on the *Annales* school their journal their influence on history historiography and other academic fields

The Battle for France & Flanders Brian Bond, Michael Taylor, 2001-10-25 The Fall of France in 1940 has been well chronicled but numerous misconceptions remain This fascinating and thought provoking collection of essays on wide ranging issues covering the politics and fighting on land sea and in the air will be greatly welcomed by academics and military history enthusiasts Topics covered include the preparations of the BEF the failure of allied counter attacks the air war the Royal Navy's role in the campaign the influence of the Battle on British military doctrine and the repercussions from the British French and German angles *Command* Anthony King, 2019-01-31 A history of modern military command from the individualist heroic generals of the twentieth century to the highly professionalised command teams of the twenty first Profiling prominent contemporary generals and

their staffs King vividly analyses divisional headquarters giving a unique insight into the transformation of military command

War of Words Rachel Chin, 2022-07-21 War of Words argues that the conflicts that erupted over French colonial territory between 1940 and 1945 are central to understanding British Vichy and Free French policy making throughout the war By analysing the rhetoric that surrounded these clashes Rachel Chin demonstrates that imperial holdings were valued as more than material and strategic resources They were formidable symbols of power prestige and national legitimacy She shows that having and holding imperial territory was at the core of competing Vichy and Free French claims to represent the true French nation and that opposing images of Franco British cooperation and rivalry were at the heart of these arguments The selected case studies show how British Vichy Free French relations evolved throughout the war and demonstrate that the French colonial empire played a decisive role in these shifts

Arming Against Hitler Eugenia C. Kiesling, 1996 In May June 1940 the Germans demolished the French Army inflicting more than 300 000 French casualties including more than 120 000 dead While many historians have focused on Frances failure to avoid this catastrophe Eugenia Kiesling is the first to show why the French had good reason to trust that their prewar defense policies military doctrine and combat forces would preserve the nation

Propaganda and Persecution Renée Poznanski, 2024-01-23 Renée Poznanski's magisterial history of the French Resistance during World War II offers a comprehensive exploration of the most significant issue in that period's social imaginary the Jewish question With extraordinary nuance she analyzes the discourse around Jews and Judaism that pervaded the Resistance's propaganda and debates while closely examining the fate of Jews under Vichy and after Poznanski argues that Jews in France suffered a double persecution one led by the Vichy government the other imposed by the Nazis Marginalization and exclusion soon led to internment and deportation to terrifying places Meanwhile a propaganda war developed between the Resistance and the official voice of Vichy Poznanski draws on a breathtaking array of sources especially clandestine publications and French language BBC transmissions to show how the Resistance both fought and accommodated the deeply entrenched antisemitism within French society Her close readings of propaganda texts against public opinions probe ambiguities and silences in Resistance writing about the persecution of the Jews and in parallel the numerous and detailed denunciations that could be read in the Jewish clandestine press This extensive synthesis extends to the post Liberation period during which the ongoing persecution of Jews in Europe and North Africa would be portrayed as secondary to the suffering of the nation The winner of the 2009 Henri Hertz Prize by the Chancellerie des Universités de Paris Sorbonne Propaganda and Persecution makes major contributions to the study of the Resistance and of antisemitism Lenn J Schramm's English translation brings Poznanski's dynamic prose to life

The World in Flames Frans Coetzee, Marilyn Shevin-Coetzee, 2011 An edited volume of primary sources from the Second World War The World in Flames A WWII Reader provides for the first time and in a convenient and comprehensive package an ambitious and wide ranging insight that conveys the sheer scale and reach of the conflict and the twelve chapter volume includes sufficient narrative and

analysis for the reader to grasp both the war's broad outlines and the context and significance of each particular source. Beginning with the growing disenchantment over the World War I peace settlements and the determination of German, Italian, and Japanese leaders to revise the situation, the book traces descent into open armed conflict with the Allies, the spectacular early successes of the Germans and Japanese, the stabilization and eventual pivotal campaigns of 1942, and the arduous efforts over the remaining three years to destroy the Axis capacity to wage war. Examples are drawn from a wide range of documents interspersed with contemporary images such as posters, photos, cartoons. Throughout, the book provides a rounded account of the struggle, balancing a consideration of strategic and tactical issues, the perspectives of the various combatant forces, the different theatres of operations, the various services involved, including aerial and naval warfare, and the experiences of participants across the spectrum from privates to generals. Furthermore, in addition to illustrating the conduct of the war, it illuminates its consequences for the societies involved. Selections treat the mobilization of labor and intellect, trace the impact upon women and children, and explore the tendency of the war to throw into bold relief both noble ideals and persistent domestic tensions, not to mention the depths of human depravity in the Holocaust. Themes that have a special resonance for the postwar era, such as the perils of nuclear weapons, are also given their due. Coupled with chapter on historical memory, these features enable students to appreciate the place of World War II in the longer course of the twentieth century.

New Directions in Strategic Thinking 2.0 Russell W. Glenn, 2018-07-06. The Australian National University's Strategic Defence Studies Centre (SDSC) is Australia's premier university-based strategic studies think tank. Fifty years after the Centre was founded in 1966, SDSC celebrated its continued research, publications, teaching, and government advisory role with a two-day conference entitled *New Directions in Strategic Thinking 2.0*. The event saw the podium graced by many of the world's premier thinkers in the strategic studies field. An evening between those tours to the lectern brought together academics, practitioners, and other honoured guests at a commemorative dinner held beneath the widespread wings of the G for George bomber in the Australian War Memorial, an event that included SDSC's own Professor Desmond Ball AO making his last public appearance. Since SDSC's 25th anniversary, the world has seen the collapse of the Soviet Union and the end of the Cold War. Bipolarity gave way to the emergence of the United States as the world's sole superpower, a status many now see as under threat. Both the nature of the threats and identity of individual competitors has changed in the interim quarter-century. Non-state actors are presenting rising challenges to national governments. Meanwhile, a diminished Russia and far more wealthy China seek to reassert themselves. Never before has the call for reasoned, innovative security studies thinking been more pronounced. Rarely has a group so able to offer that thought come together as was the case in July 2016. This book encapsulates the essence of this cutting-edge thinking and is a must-read for those concerned with emerging strategic challenges facing Australia and its security partners.

A Documentary History of Modern Europe Thomas Garden Barnes, Gerald D. Feldman, 1982-04. A chronological history of Modern Europe from 1914 to the present. *How Fighting*

Ends Holger Afflerbach, Hew Strachan, 2012-07-26 There are many histories of how wars have begun but very few which discuss how they have ended This book fills that gap Beginning with the Stone Age and ending with globalized terrorism it addresses the specific issue of surrender rather than the subsequent establishment of peace At its heart is the individual warrior or soldier and his or her decision to lay down arms In the ancient world surrender led in most cases to slavery but a slave still lived rather than died In the modern world international law gives the soldiers rights as prisoners of war and those rights include the prospect of their eventual return home But individuals can surrender at any point in a war and without having such an effect that they end the war The termination of hostilities depends on a collective act for its consequences to be decisive It also requires the enemy to accept the offer to surrender in the midst of combat In other words like so much else in war surrender depends on reciprocity on the readiness of one side to stop fighting and of the other to accept that readiness This volume argues that surrender is the single biggest contributor to the containment of violence in warfare offering the vanquished the opportunity to survive and the victor the chance to show moderation and magnanimity Since the rules of surrender have developed over time they form a key element in understanding the cultural history of warfare

Vision and Method in Historical Sociology Theda Skocpol, 1984-09-28 Examines the careers and contributions of nine major scholars who have been influential in the development of historical sociology Covers the work of Marc Bloch Karl Polanyi S N Eisenstadt Reinhard Bendix Perry Anderson E P Thompson Charles Tilly Immanuel Wallerstein and Barrington Moore Jr

On the Nation and the Jewish People Shlomo Sand, Ernest Renan, 2010-11-22 Ernest Renan was one of the intellectual giants of the second half of the nineteenth century in France the man who first opened up the study of nationalism In this book Shlomo Sand the author of the best selling *The Invention of the Jewish People* demonstrates the complexity of Renan's thought Sand shows the relationship of Renan's work to that of key twentieth century thinkers on nationalism such as Raymond Aron and Ernest Gellner and argues for the continued importance of studying Renan Alongside his essay Sand presents two classic lectures by Renan the first the renowned *What Is a Nation* argues that nations are not based upon race religion and language in the second he uses historical evidence to show that the Jews cannot be considered a pure ethnos *On the Nation and the Jewish People* is an important contribution to the understanding of nationalism bringing back into play the work of a profoundly misunderstood thinker

Paris and the Provinces Peter Alexis Gourevitch, 1980-01-01 Estudio sobre el gobierno local de paris y las provincias a lo largo de la historia

Secret Intelligence in the European States System, 1918-1989 Jonathan Haslam, Karina Urbach, 2013-12-18 The history of secret intelligence like secret intelligence itself is fraught with difficulties surrounding both the reliability and completeness of the sources and the motivations behind their release which can be the product of ongoing propaganda efforts as well as competition among agencies Indeed these difficulties lead to the Scylla and Charybdis of overestimating the importance of secret intelligence for foreign policy and statecraft and also underestimating its importance in these same areas problems

that generally beset the actual use of secret intelligence in modern states But in recent decades traditional perspectives have given ground and judgments have been revised in light of new evidence This volume brings together a collection of essays avoiding the traditional pitfalls while carrying out the essential task of analyzing the recent evidence concerning the history of the European state system of the last century The essays offer an array of insight across countries and across time Together they highlight the critical importance of the prevailing domestic circumstances technological governmental ideological cultural financial in which intelligence operates A keen interdisciplinary eye focused on these developments leaves us with a far more complete understanding of secret intelligence in Europe than we've had before

The Sources of Military Doctrine Barry R. Posen, 2014-09-10 Barry R Posen explores how military doctrine takes shape and the role it plays in grand strategy that collection of military economic and political means and ends with which a state attempts to achieve security Posen isolates three crucial elements of a given strategic doctrine its offensive defensive or deterrent characteristics its integration of military resources with political aims and the degree of military or operational innovation it contains He then examines these components of doctrine from the perspectives of organization theory and balance of power theory taking into account the influence of technology and geography Looking at interwar France Britain and Germany Posen challenges each theory to explain the German Blitzkrieg the British air defense system and the French Army's defensive doctrine often associated with the Maginot Line This rigorous comparative study in which the balance of power theory emerges as the more useful not only allows us to discover important implications for the study of national strategy today but also serves to sharpen our understanding of the origins of World War II

Child of Paradise Edward Baron Turk, 1989 Traces the career of the influential French director and uses psychoanalytical concepts to analyze his major films

Framing the First World War Michael P.M. Finch, Aimée Fox, David G. Morgan-Owen, 2025-11-18 The character of the conflict that erupted in 1914 defied the expectations of many political leaders and military analysts Despite the mountains of books and articles published on World War I there has been surprisingly little systematic or comparative research on how military commanders and politicians framed and interpreted the conflict or indeed on how they understood war itself and how that understanding shaped their decision making Wars are fought by organizations and people who have disparate visions of the world they live in and the conflict they are fighting In *Framing the First World War* a team of leading scholars explore the gulf between imagined warfare and the realities of battle By doing so they investigate how the military forces that contested the First World War framed the conflict they were involved in and how those perspectives shaped and influenced the ways in which they sought to understand conduct and respond to the war They use the notion of frames and the concept of framing to enable us to engage directly with the complexity and diversity of the conflict which was fought for different reasons and in different ways incorporating a range of issues with implications for the conduct of the war Improving our appreciation of how commanders saw the world around them and their views on the war they were conducting opens up valuable new approaches

for understanding debates over the higher direction of the conflict and the civil military relations that underpinned them The contributors to *Framing the First World War* work towards a fuller historical appraisal of how military figures understood the war moving beyond a purely military analysis to incorporate broader cultural and social topics including education medicine politics and law
