Resources in Education ,1990 **Books in Print** ,1979 **Disruptive Technology and Digital Transformation for Business and Government** Sandhu, Kamaljeet,2021-05-07 With the far reaching global impact of the COVID 19 pandemic the demand and the necessity for digital enterprise transformation have accelerated exponentially Management and strategies for the adoption and wider usage of newer digital technologies for the transformation of an enterprise through digital tools such as real time video communications have shown that people no longer need to be required to be physically present in the same place rather they can be geographically dispersed Technologies such as artificial intelligence cloud computing digital banking and cloud data have taken over tasks that were initially done by human hands and have increased both the automation and efficiency of tasks and the accessibility of information and services Inclusion of all these newer technologies has shown the fast pace at which the digital enterprise transformation is rapidly evolving and how new ecosystems are reshaping the digital enterprise model Disruptive Technology and Digital Transformation for Business and Government presents interesting research on digital enterprise transformation at different stages and across different settings within government and industry along with key issues and deeper insights on the core problems and developing solutions and recommendations for digital enterprise transformation The chapters examine the three core leaders of transformation the people such as managers employees and customers the digital technology such as artificial intelligence and robotics and the digital enterprise including the products and services being transformed They unravel the underlying process for management and strategies to fully incorporate new digital tools and technologies across all aspects of an enterprise undergoing transformation This book is ideally intended for managers executives IT consultants business professionals government officials researchers students practitioners stakeholders academicians and anyone else looking to learn about new developments in digital enterprise transformation of business systems from a global perspective *Trade, Migration and Law* Victor T. Amadi,2022-03-24 This book explores how law and policy makers within the Southern African Development Community regional structure might reform the legal and regulatory frameworks to best capitalise the benefits of the movement of people drawing lessons from other experienced jurisdictions by critically engaging with the regulatory efforts and approaches in regions such as the European Union the Economic Community of West African States and the East African Community to propose a revised approach to migration governance and practice in the SADC Deeper regional integration allows citizens to move freely across national boundaries and services are a rising component of global trade and investment However global trade in services is stifled by barriers at and behind the border These barriers make it difficult for service providers from developing regions to access key markets in their preferred modes of service trade Against this background this book aims to take the discussion on furthering regional integration and trade through the movement of people by tackling issues on stringent immigration policies arguing that having a vibrant and rewarding trade in services will

require an approach towards the unrestricted movement of persons **Strategic Management/Business Policy 7** Thomas L. Wheelen, J.
