Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were some academic papers which used mixed methodology because of the nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each

article in the proceedings is unique. Mostly there is no general argument leading from one contribution to the next. However, it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth. With regard to human capital development, papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic. Thus, the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors. Furthermore, it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation. With regard to technology and big data impact on organisational performance, it was evident that system performance, memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance. Most of the articles contributed reemphasised technology education and training as a means of digitising business and improving effectiveness. Target audience: The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics, information management, business education, development studies, social sciences and technology. It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment.

South Africa Yearbook, 2006      *Municipal Management* Annelise Venter, 2007. Book the constitutional dispensation as it affects municipalities, the strategic orientation of municipalities within the global and national contexts, the capacities and resources available, best practices as far as management processes, procedures and methods are concerned. The book explores the multifaceted nature of municipal management in South Africa and focuses the readers' attention on selected key strategic issues such as local economic development, local democracy, disaster risk reduction.      **Managing Sustainable Stakeholder Relationships** Linda O'Riordan, 2017-09-01. This book examines corporate approaches to responsible management by investigating the stakeholder relationships between business and society. Though concepts of responsible management continue to evolve, its key objective is to explore the opportunities and dilemmas which business decision makers face when attempting to reconcile their organisation's interests with those of other stakeholder groups. In this intensely debated field, it focuses on the power of entrepreneurial purpose and the opportunities which emerge when corporate choices and actions are driven by connected stakeholder interests. A case study of the pharmaceutical industry in the UK and Germany is presented to reveal how decision makers in this particular sector are responding to their context-specific management challenges. The research findings are subsequently employed to examine and revise a pre-specified stakeholder management framework which was previously developed by the author. The proposed updated framework is the

book's main conceptual contribution. By depicting a set of inclusive, integrated and inter-related steps, it is intended to provide an innovative, comprehensive practical toolkit for stakeholder management. As such, it is designed to help decision makers to attain the greatest possible outcome from the resources they invest by consciously basing their choices not merely on the impacts for their shareholders but also and more holistically for a broader range of stakeholders. Ultimately, the book demonstrates how optimally harmonised stakeholder management can serve as a powerful catalyst for unlocking viable business opportunities which serve the interests of business and society.
