Bessant, 2014-04-14. Innovative organizations grow twice as fast both in employment and sales as those that fail to innovate. The social benefits of innovation are even greater. This first edition of Strategic Innovation Management is an exciting new addition to the established bestselling texts *Managing Innovation* and *Innovation and Entrepreneurship* written by Joe Tidd and John Bessant. Aimed at students taking courses in business studies and management as well as non-specialist courses in other disciplines, this book provides a practical and accessible evidence-based approach to managing innovation in a wide range of contexts, including manufacturing services, small to large organizations, and the private, public, and third sectors. The text has been designed to be fully integrated with the Innovation Portal at www.innovationportal.info, which contains an extensive collection of additional resources for both lecturers and students, including teaching resources, case studies, media clips, innovation tools, seminar and assessment activities, and over 300 test bank questions. **Value Creation in Management Accounting and Strategic Management** Satoshi Sugahara, Nabyla Daidj, Sumitaka Ushio, 2017-09-25. This book explores two combined approaches: strategy and accounting from a cross-disciplinary perspective in order to improve knowledge of value creation in various contexts. Existing studies on this topic have generally adopted a purely account-based or strategy-oriented approach to address this issue. However, this book draws upon a number of well-defined theoretical and empirical backgrounds and methodologies. Since the 1980s, many changes have occurred, and companies have increasingly focused their strategies on value creation. Consequently, new strategic directions have emerged, especially for managerial accounting. Management accounting and alignment with strategy could thus improve performance. This book encourages further thought and reflection on these issues, which should be pursued in the future as firms face new challenges associated with the acceleration of digital transformation. *Testing in the Professions* Susan Davis-Becker, Chad W. Buckendahl, 2017-03-16. Testing in the Professions focuses on current practices in credentialing testing as a guide for practitioners. Written by leading experts in the field of measurement and assessment, each chapter includes authentic examples as to how various practices are implemented or current issues observed in credentialing programs. The volume begins with an exploration of the various types of credentialing programs as well as key differences in the interpretation and evaluation of test scores. The next set of chapters discusses key test development steps, including test design, content development, analysis, and evaluation. The final set of chapters addresses specific topics that span the testing process, including communication with stakeholders, security program evaluation, and legal principles.
