intended to be non partisan elected boards However this is where many school boards find themselves today The chapters in this volume address several key questions school board members are currently facing as they struggle to protect some of our country s earliest guardrails of democracy local control of schools To be sure school boards are no longer the forgotten players Implications of this may be wide reaching and therefore deserve room in the current literature on educational governance Volume II of the Research on the Superintendency series highlights recent research on school boards local control governance and the superintendency Each chapter is briefly described and the chapters are in a particular order that readers may wish to pay attention to as they enjoy the book The first three chapters deal with local control in both rural and urban settings The next two chapters are studies focused mainly on school boards and how their roles have shifted over the years followed by a chapter on the relationship between school boards and their superintendents within a regulatory environment and the level of stress it can bring to board members and superintendents The final five chapters describe recent superintendent research that is closely linked to school governance or school board policies We ask readers to juxtapose lessons learned in those five chapters to the role of school boards within the context of those chapters

The Modern School Superintendent Marvin Edwards, 2006 An impossible job That s what many have called the superintendency With its growing and completing demands it is a profession that can baffle

even the most knowledgeable and well prepared Public education resources have become more limited There are new national and state testing requirements Social issues are pulled into the schools and want more control over their operation Add in politics and bureaucracy and the end result is quite an unmanageable scenario Unfortunately more superintendents seem to be leaving the profession Whether it is because of the demands superintendents face the quality of preparation programs or a combination of both the trend is a growing concern Many superintendents are unprepared to deal with what they may encounter in running a school district Yet the office is not all doom and gloom Offering opportunities that are unavailable in many other careers the superintendency is a position in which you will be taken seriously by others And it is a profession in which one person through skilled leadership can make a difference by getting everyone to pull together and create a better environment for students Surveys actually have shown that most superintendents would become superintendents again if they had the chance

Achieving Success for New and Aspiring Superintendents Mary Frances Callan, William Levinson, 2011 The authors of this book wrote it for those aspiring to be superintendents those new to the position and those completing their second or third year and who are looking to the future What makes their approach unique is the belief that talented people who aspire to be superintendents are far more likely to accomplish that goal and achieve success on the job if they understand the totality of the position School districts are complex organizations Providing effective leadership to these organizations requires mastery of a wide array of leadership and organizational skills Aspiring superintendents with vision and motivation who understand the inherent challenges of the position have a great advantage over those who do not The book's goal is to provide readers with this advantage This is why the book covers the full cycle of the first superintendent position preparation application and transition the challenges of the first few years and the decision to stay or move to another position Aspiring and new superintendents who read the book will learn about the full range of skills and knowledge needed to succeed They will be better prepared to be effective superintendents
