Fight to Win A.J. Withers, 2021-11-10T00:00:00Z A.J. Withers draws on their own experiences as an organizer, extensive interviews with the Ontario Coalition Against Poverty (OCAP) activists, and Toronto bureaucrats and freedom of information requests to provide a detailed account of the work of OCAP. This book shows that poor people's organizing can be effective even in periods of neoliberal retrenchment. *Fight to Win* tells the stories of four key OCAP homelessness campaigns: stopping the criminalization of homeless people in a public park, the fight for poor people's access to the Housing Shelter Fund, a campaign to improve the emergency shelter system, and the City's overarching but inadequate Housing First policy, and the attempt by the City of Toronto to drive homeless people from encampments during the COVID pandemic. This book shows how power works at the municipal level, including the use of a multitude of demobilization tactics, devaluing poor people as sources of knowledge about their own lives, and gaslighting poor people and anti-poverty activists. A.J. Withers also details OCAP's dual activist strategy: direct action, casework, coupled with mass mobilization for both immediate need and long-term change. These campaigns demonstrate the validity of OCAP's longstanding critiques of dominant homelessness policies and practices. Each campaign was fully or partially successful; these victories were secured by anti-poverty activists through the use of, and the threat of, direct disruptive action tactics.

discover an intelligent civilization on an exoplanet elsewhere in the Milky Way what would be humanity's moral responsibility to protect Earth from an existential threat To treat other intelligences with dignity To exploit through interstellar commerce To conquer Audience The book will attract readers from a wide range of interests including astronomers astrobiologists chemists biologists space engineers ethicists theologians and philosophers Natural Remedies in the Fight Against Parasites Hanem Khater,M. Govindarajan,Giovanni Benelli,2017-07-12 This book emphasizes past and current research efforts about principles of natural control of major parasites affecting humans animals and crops Each chapter is a complete and integrated subject that presents a problem and confers on the safe alternatives to chemicals This book discusses and updates information about three major topics of natural remedies The first topic is represented in a chapter outlining important information on biological control of parasites the second topic is represented in three chapters dealing with botanicals as promising antiparasitic agents and the last four chapters deal with miscellaneous control strategies against parasites This easily readable book is designed precisely for students as well as professors linked with the field of parasitic control We enhanced words with breathing areas in the form of graphical abstracts figures photographs and tables **The Oxford Handbook of Adult Cognitive Disorders** Robert A. Stern (Ph. D.),Michael L. identified Similarly single cell analyses of cytokines and master transcriptional factors have revealed that at the population level CD4 T cell responses are far more heterogeneous than initially anticipated While some of the checkpoints in Th cell specification have been identified recent studies of transcriptional and epigenetic regulation have uncovered a significant flexibility during the course CD4 T lymphocyte polarization In addition Th cells expressing cytokines with counteracting functions as a measure of self regulation display yet another level of diversity Understanding the mechanisms that control the balance between stability vs plasticity of Th effectors both at the time of initiation of immune response and during development of CD4 T cell memory is critical for the rational design of better vaccines and new immunotherapeutic strategies This research topic will cover current views on Th cell development with a focus on the mechanisms that govern differentiation function and regulation of effector Th cells in the context of microbial infections
